sharpe and koperwas provide a methodological framework that objectifies the complexity of behavior this book s quantitative and multiple event approach to data collection and analysis is essential for effective descriptions and explanations of the behavior of humans and nonhumans of particular note is the multidisciplinary applicability of the methodology and that the methods can be used by basic applied and clinical researchers human service providers are being increasingly pressured to take objective measures practitioners should find much in this book to help them satisfactorily meet these demands the authors sensitivity to clarity of presentation makes the book an excellent primary or supplementary text for any course in behavior methodology dennis j delprato eastern michigan university i think the author did a very thoughtful informed analysis and presentation of his view of research methodology richard w malott western michigan university this text dispels the myth that the principles and practices of behavioral research are context free it describes how they are integral to a modern science of behavior this is not only a how to text but an historical where from and a modern what for treatment of behavioral methodology and research design edward k morris university of kansas modern computer based data collection and analysis techniques have given researchers unprecedented ability to collect analyze and visually represent complex multi event configurations of behavior interaction yet most applied behavior analysis textbooks have failed to embrace the many significant technological advances behavior and sequential analyses principles and practice provides a step by step approach to such computer facilitated behavior analysis research and evaluation procedures tom sharpe and john koperwas emphasize methods designed to collect and analyze both the multiple characteristics of behaviors and events of interest and the time based or sequential characteristics of behavior and event relationships intended for an interdisciplinary audience this is the only text to guide readers through development and implementation of technologically supported multiple event multiple measure discrete and sequential analysis of behavior designed for highly interactive applied settings this user friendly volume includes procedures for observation system construction data recording methods and research design types visual and statistical data analysis procedures recommended research evaluation and instructional applications for psychology education and other social science

settings suggestions for reliability and treatment fidelity issues references to technological innovations including the best and bestpcc data collection and analysis software package behavior and sequential analyses presents a comprehensive summary of applied behavior analysis methods and introduces numerous up to date systems and sequential methodologies to facilitate student learning the authors include lists of key terms study guide questions practical illustrations and important references developed as an introductory to intermediate level methodology text for advanced undergraduate and graduate students in social and behavioral sciences and education behavior and sequential analyses is also a unique and indispensable reference for the experienced researcher

behavior and psychological man essays in motivation and learning is a collection of edward chace tolman s seminal papers tracing the evolution of his systematic theory of purposive behaviorism compiled by former students and colleagues this anthology not only honors tolman s contributions during his tenure at the university of california but also serves as a valuable psychological document the essays illustrate the trajectory of tolman s thinking from its nascent stages to a mature albeit continually evolving framework that integrates experimental findings with theoretical innovation tolman s work is characterized by its breadth and inclusivity embracing all aspects of psychological inquiry his insistence on exploring behavior as multidetermined led to the development of a system that encompassed learning motivation perception and personality a pioneer in the use of hypothetical constructs and intervening variables tolman advanced a centralist approach to psychology bridging behaviorism gestalt theory and depth psychology his emphasis on molar behavior and cognitive maps reintroduced complexity and purposiveness to psychological theory transforming how learning problem solving and human behavior are understood this collection which combines rigorous science with tolman s characteristic wit and creativity not only captures the essence of his theories but also reflects the humanistic and collaborative spirit that defined his teaching and scientific legacy this title is part of uc press s voices revived program which commemorates university of california press s mission to seek out and cultivate the brightest minds and give them voice reach and impact drawing on a backlist dating to 1893 voices revived makes high quality peer reviewed scholarship accessible once again using print on demand technology this title was originally published in 1961

learned and fixed behaviors underlie many of the patterns we observe in songbirds but the environmental context in which these patterns occur is changing quickly often to the detriment of the individual and species the goal of this book is to weave concepts of behavior more tightly into our

conservation strategies each chapter describes the current understanding of behavior in relation to a particular songbird life history trait the authors then evaluate challenges that songbirds face in the anthropocene and explore the role of behavior in addressing these challenges the future is uncertain for songbirds but broadening our management toolkit will increase the potential for success

this volume reports results of a large longitudinal study investigating delinquency substance use sexual intercourse conduct problems physical aggression covert behavior attention deficit disorder and depression from childhood to adolescence

now in a fully updated second edition this essential volume provides research based strategies to help educators address challenging behaviors in early childhood and elementary years drawing on research and approaches from the fields of neuroscience child development child psychiatry counseling and applied behavior analysis this text offers teachers simple strategies to manage behaviors and promote mental health and resilience in young children thoroughly updated to reflect new developments in neuroscience trauma and physical and mental health this second edition also features an entirely new chapter on classroom approaches in child mental health including the interaction of technology with challenging behaviors and mental health issues comprehensive multidisciplinary and culturally responsive this critical resource provides new and experienced educators and coaches with educational and intervention approaches that are appropriate for all children with and without disabilities

in this book a study is presented on the attitudes of 12 to 20 year old youngsters towards social limits imposed by their social and educational environment by means of laws rules values norms or expectations the study is part of a research programme on the course and treatment of juvenile delinquency which started at the rijksuniversiteit groningen during the eighties young people s attitudes towards social limits are assessed by the standard reaction instrument a critical incident technique is used to elicit young people s knowledge behavioral intentions and motivations in ten hypothetical situations including social limits the instrument was administered from youngsters in secondary schools and from same aged detained youngsters who have committed at least one criminal offence which has been recorded by police or judicial authorities the responses of both groups are compared in order to test the validity of the instrument further the relationship is tested between the youngsters attitudes towards social limits and self reported delinquent and aggressive behavior finally a comparison is made between the responses of flemish and dutch youngsters starting point of the empirical study is a social

psychological view on juvenile delinquency in this view which is based on the self presentation paradigm developed by the sociologist ervin goffman and the early symbolic interactionists juvenile delinquency is considered as a means of social communication towards significant others parents teachers peers society special attention is paid to the development maintenance and management of social reputation by the juvenile delinquent

master s thesis from the year 2013 in the subject psychology work business organisation grade 2 3 technical university of munich language english abstract when going for grocery shopping some consumers make up their minds about what to buy and write down shopping lists others just go into the supermarket and do not really think beforehand about the things they need although in both situations individuals engage in different ways of decision making on the purchase of groceries when coming home and putting things into the shelve they positively or negatively assess the things they bought whereas in some situations one gets a positive feeling because e g s he purchased all the products on the shopping list in another situation a consumer might end up being bored because s he just bought the groceries which are perceived as useful and did not listen to his her inner voice calling for more than just the fulfillment of utilitarian needs generally consumers can consciously do their purchases and decide for products after thinking on it or can consider a product s attributes and let their intuition decide in the interest of the consumer the question emerges how the consumer decides at best does a consumer receive greater satisfaction from consciously elaborating about the products s he is facing or is it better not to think consciously when facing product choices this question is differently assessed by different models on decision making whereas some authors ajzen 2011 bandura 1986 1997 deci ryan 1985 payne et al 1993 emphasize consciousness in decision making there is also a large number of proponents of unconscious thought dijksterhuis 2004 dijksterhuis et al 2005 2006a 2006b 2006c levine 1996 bargh 2002 and wilson et al 1993 dijksterhuis and nordgren 2006b p 96 argue for the superiority of unconscious decision making by mentioning that conscious thought is constrained by the low capacity of consciousness which results in sub optimal choices with regard to food products this general superiority of unconscious thought is highly questionable on the one hand consumers constrain themselves in taking into account only specific products which respect certain criteria as e g with diabetics and food products with less sugar content on the other hand food products are also bought because consumers want to confirm their conscience by purchasing e g fair trade products which among other things are associated with a fair payment of farmers

this book presents a thorough overview of a model of human functioning based on the idea that behavior is goal directed and regulated by feedback

control processes it describes feedback processes and their application to behavior considers goals and the idea that goals are organized hierarchically examines affect as deriving from a different kind of feedback process and analyzes how success expectancies influence whether people keep trying to attain goals or disengage later sections consider a series of emerging themes including dynamic systems as a model for shifting among goals catastrophe theory as a model for persistence and the question of whether behavior is controlled or instead emerges three chapters consider the implications of these various ideas for understanding maladaptive behavior and the closing chapter asks whether goals are a necessity of life throughout theory is presented in the context of diverse issues that link the theory to other literatures

covers lectures of the annual symposium which began in 1969
