avenir des soins de santé au canada préside par roy j romanow remerciements v 1 p ix

the fiscal sustainability of health care the first of a three volume set of selected papers from the romanow commission comprises the most influential discussion papers on the fiscal sustainability of public health care in the future the subjects covered include the current and potential cost drivers of the system the financing and delivery of health care fiscal federalism and international trade regimes while some of the contributors are among canada s best known and respected figures in the field others are relatively new scholars from canada and abroad who bring fresh perspectives and new insights to the issue of fiscal sustainability presenting divergent diagnoses and policy prescriptions the papers collectively highlight the many factors that governments and health care sector managers must confront to keep the canadian health care system viable in the 21st century

canadians are deeply worried about wait times for health care entrepreneurial doctors and private clinics are bringing charter challenges to existing laws restrictive of a two tier system they argue that canada is an outlier among developed countries in limiting options to jump the queue this book explores whether a two tier model is a solution in is two tier health care the future leading researchers explore the public and private mix in canada australia germany france and ireland they explain the history and complexity of interactions between public and private funding of health care and the many regulations and policies found in different countries used to both inhibit and sometimes to encourage two tier care such as tax breaks this edited collection provides critical evidence on the different approaches to regulating two tier care across different countries and what could work in canada published in english

chad emery evans was wrongfully convicted in december 2001 in new hampshire of the murder of kassidy bortner the 21 month old daughter of his girlfriend amanda bortner the causes of her death and her injuries are mysterious and disputed but chad was convicted of second degree murder on june 2 2000 chad met amanda and their relationship grew rapidly by early july amanda and chad were living together chad s three year old son kyle also lived in the home several days a week through shared custody with chad s former wife on the morning of november 9 2000 amanda took kassidy to the kittery maine home of her sister jennifer bortner and her sister s boyfriend jefferey marshall for babysitting for the day kassidy had a new bruise on one eye due to an accident the previous night when chad was giving kyle some batting practice with a brown plastic bat in kyle s bedroom just before bedtime while wiffle balls were usually used for such fun the ball that kyle hit into kassidy s eye was a tee ball the resulting bruise to kassidy s left eye was the latest of a series of bruises

which had been observed by many people during the fall of 2000 in a time of growing sensitivity to child abuse most of the responsible adults close to kassidy chose to believe that the bruises and injuries were unfortunate accidents and that they didn t require medical care right away the life threatening severity of the injuries was not known or suspected by anyone tragically those adults including chad evans were unaware that there was something very wrong with kassidy because of the accidents or perhaps because of a chronic condition disease or toxin chad evans never spanked nor hit kassidy bortner he loved and cared for her shortly after noon on the 9th jeff marshall checked on kassidy and recognized that she was in trouble and seemingly lifeless and he made several phone calls for help the emt s and kittery police arrived quickly but kassidy was dead when they arrived as the man living with kassidy s mother amanda bortner chad evans was an initial suspect by the time of chad s 7 10 p m interview with the police and within about seven hours of kassidy s death the police were focused entirely on chad and worked thereafter to build the case against him at his december 2001 trial chad took his attorneys advice not to testify and his attorneys decided to call only one defense witness they called the nationally renowned forensic pathologist dr michael baden as they thought his testimony was sufficient to establish the reasonable doubt needed for a not guilty verdict however their assessment was wrong and the jury found chad guilty of most of the charges in november 2002 amanda bortner was tried and found guilty of two counts of child endangerment and sentenced to two years in jail in 2011 chad evans began his tenth year in the new hampshire state prison for crimes he didn t commit he passed a lie detector test given in july 2010 in september 2010 a report was discovered of a dna test conducted by the maine state police in march 2001 the test on blood found underneath all ten of kassidy bortner s fingernails showed that the blood belonged to kassidy the dna test on the substance on a paper towel found where kassidy was sitting on the day she died showed saliva that belonged to a male prior to chad s trial the existence of the blood was in a report available to his defense lawyers but it was not mentioned by anyone on either side at the trial the dna test and report was never disclosed to the defense also not disclosed was information about kassidy s medical appointments in august and september 2000 the jury also did not know about a family gathering four days before kassidy died where only one bruise was seen on her right cheek eye contact tells the story of the wrongful convictions of chad and amanda and the campaign for exoneration

this companion is a timely addition it contains 50 chapters from 90 contributors around the world on the topical and policy relevant aspects of health economics there is a balanced coverage of theoretical and empirical materials and conceptual and practical issues i have found the companion very useful sukhan jackson

economic analysis and policy this encyclopedic work provides interested readers with an authoritative and comprehensive overview of many if not all of the current research issues in health economics highly recommended upper level undergraduates and above r m mullner choice the aim of the elgar companion to health economics is to take an audience of advanced undergraduates postgraduates and researchers to the frontier of research in health economics by providing them with short and easily readable introductions to key topics the volume brings together 50 chapters written by more than 90 leading international contributors the contributions to the companion are concise and focus on specific concepts methods and key evidence the companion is a comprehensive and authoritative original reference volume covering theoretical and empirical issues in health economics with a balanced range of material on equity and efficiency in health care systems health technology assessment and issues of concern for low and middle income countries it is organised into two broad sections the first deals with the economics of population health and of health care systems analysed with both equity and efficiency goals in mind the second covers the conceptual and practical issues that arise in the evaluation of health care technologies most often applied to pharmaceuticals but also relevant for other interventions many of the contributions address topical and policy relevant issues including the economic causes of the growth of obesity in the west the link between illicit drug use and crime the consequences of leaving people uninsured against the costs of health care the impact of globalisation on the international trade in health care services the role of informal payments in many health care systems what equal treatment for equal needs means in practice whether direct to consumer advertising of pharmaceuticals is desirable and how economic evidence is influencing the way that new technologies are made available to patients other chapters stress the research done by health economists to develop theoretical models and empirical methods that illuminate the workings of health care systems
