os ensaios presentes neste livro constituem uma reflexão inicial que pode ajudar sobremaneira aqueles que estão dando os primeiros passos nos estudos filosófico teológicos são também acessíveis para o grande público já que sua escrita é clara e objetiva procurando iluminar questões centrais tanto da filosofia quanto dos três ramos principais da teologia sistemática a antropologia teológica a cristologia e a teologia trinitária a partir desse esforço intelectual e de vida a marta luzie afirma ter encontrado a compreensão da essência do ser humano e do drama que é a vida aliás como diz um dos maiores teólogos católicos do século xx a vida não é uma comédia tampouco uma tragédia ela é simplesmente uma repetição do drama vivenciado por jesus cristo

through examination of the death penalty in literature aaron aquilina contests heidegger s concept of being towards death and proposes a new understanding of the political and philosophical subject dickens nabokov hugo sophocles and many others explore capital punishment in their works from antigone to invitation to a beheading using these varied case studies aquilina demonstrates how they all highlight two aspects of the experience first they uncover a particular state of being or more precisely non being that comes with a death sentence and second they reveal how this state exists beyond death row as

sovereignty and alterity are by no means confined to a prison cell in contrast to heidegger's being towards death which individualizes the subject only i can die my own death supposedly this book argues that when condemned to death the self and death collide putting under erasure the category of subjectivity itself be it death row or not when the supposed futurity of death is brought into the here and now we encounter what aquilina calls relational death living on with death severs the subject's relation to itself the other and political sociality as a whole rendering the human less a named and recognizable being than an anonymous living corpse a human thing in a sustained engagement with blanchot levinas hegel agamben and derrida the ontology of death articulates a new theory of the subject beyond political subjectivity defined by sovereignty and beyond the heideggerian notion of ontological selfhood

in the early 1950s german philosopher martin heidegger proclaimed the austrian expressionist georg trakl to be the poet of his generation and of the hidden occident trakl a guilt ridden lyricist who died of a cocaine overdose in the early days of world war i thus became for heidegger a redemptive successor to hölderlin drawing on derrida's geschlecht series and substantial archival research dialogue on the threshold explores the productive and problematic tensions that pervade heidegger's reading of trakl and reflects more broadly on the thresholds that separate philosophy from poetry gathering from dispersion the same from the other and the native from the foreigner ian alexander moore examines why heidegger was reluctant to follow trakl's invitation to cross these thresholds even though his encounter with the poet did compel him to take up in astounding ways many underrepresented topics in his philosophical corpus such as sexual difference pain animality and christianity a contribution not just to heidegger and trakl studies but also more modestly to the old quarrel between philosophy and poetry dialogue on the threshold concludes with new translations of eighteen poems by trakl

is there a world out there independent of the way we experience it think of it or talk about it if so can we know how it is these questions have been a central concern of philosophy throughout most of its history and they continue to be the subject of an intense debate between realists and antirealists in this clearly written and comprehensive book søren harnow klausen presents an argument for realism about the external world but also attempts to take the antirealist challenge seriously a sensible realist must acknowledge the force of the skeptical objections and avoid overstating her own case the book covers a wide range of themes from the historical origins of antirealism and the views of berkeley kant husserl and the logical positivists to the most

recent developments in epistemology and relevant empirical research in psychology anthropology and linguistics topics also include the definition of realism and its relationship to semantics and theories of truth the prospect of providing a transcendental argument for realism inference to the best explanation externalist theories of justification the basis of our understanding of mind independent reality the relevance of evolutionary biology to the realism issue and theories of intentionality and perception

this book explores the concept of academic freedom from a european vantage point drawing on both philosophical and legal perspectives the editors and contributors analyse the concept of academic freedom within the present institutional setting academic freedom has long been considered a natural part of higher education but as the world enters the digital age a renewed understanding of its role and the threats it must face is required the authors question the purpose of science without freedom and subsequently the purpose of political communities without free science although the book uses european case studies to answer these questions it undoubtedly has global relevance what would be left of the present notion of the global world were we to conceive of its character without modern science this book calls for a critical re examination of the academic community and its own understanding of the sources conditions and aims of scientific practice

the fifth edition of the classic philosophical work featuring heidegger s margin notes from his personal copy of the book plus four new appendices one of heidegger s most important and extraordinary works indispensable for anyone interested in heidegger s thought as well as in current trends in hermeneutics ethics and political philosophy interpretation since its original publication in 1929 martin heidegger s provocative book on kant s critique of pure reason has attracted much attention both as an important contribution to twentieth century kant scholarship and as a pivotal work in heidegger s own development after being and time this fifth enlarged edition includes marginal notations made by heidegger in his personal copy of the book and four new appendices heidegger s postpublication notes on the book his review of ernst cassirer s philosophy of symbolic forms heidegger s response to reviews by rudolf odebrecht and cassirer and an essay on the history of the philosophical chair since 1866 the work is significant not only for its illuminating assessment of kant s thought but also for its elaboration of themes first broached in being and time especially the problem of how heidegger proposed to enact his destruction of the metaphysical tradition and the role that his reading of kant would play therein heidegger s interpretation of kant remains a challenging way

to address the issues that both Kant and Heidegger saw as crucial in reading Kant and the problem of metaphysics we can struggle with some basic issues of human existence in the company of two great minds. International Philosophical Quarterly with every passing year this work continues to grow in significance and stature. Publication of this new translation could not be more timely. A finely nuanced translation, this authoritative English translation will play an important role in determining Heidegger's reputation in the coming years. An essential acquisition for all collections. Choice

Heidegger's Kant book belongs with the most important exchanges of the 20th century with the philosopher. Konigsberg. The book contains the numerous marginalia from Heidegger's handwritten copy. The appendix brings Heidegger's annotations to the Kant book as well as several texts that Heidegger's philosophical exchange with Ernst Cassirer and the Marburger Neokantianism document. Among them also the report on the Davos Disputation of Heidegger with Cassirer in early 1929 as well as the essay on the history of the philosophical chair since 1866 in which Heidegger gives a pregnant presentation of the history of the Marburger Neokantianism from Hermann Cohen over Paul Natorp to Ernst Cassirer and Nicolai Hartmann. In Kant and the Problem of Metaphysics Heidegger, in contrast to the Neokantian interpretation of Kant's Critique of Pure Reason as a theory of knowledge and a theory of experience, interprets this first main work of Kant as a foundation of metaphysics, whose original repetition is the fundamental ontology as metaphysics of Dasein. In Sein und Zeit, Kant and the Problem of Metaphysics understands itself as a historical introduction to the problematics treated in Sein und Zeit. What, however, Heidegger achieves through this is that against Kant, violence was used in the direction of a more original formulation of the transcendental project. In his unity, the presentation of the transcendental power of imagination is a Kantian interpretation that is historically incorrect, but it is historically, that is, in preparation for future thought and only directed at that.

Excerpt from Kant and the Problem of Metaphysics: The question of the being of the *came to be* at a definite moment in time of the Greek philosophers.
