Love Inspired suspense brings you three new titles at a great value available now. Enjoy these suspenseful romances of danger and faith: *Rocky Mountain Sabotage* by Jill Elizabeth Nelson: After the private plane that Lauren Carter, her mother and executives from her stepfather's company are taking is sabotaged, they're forced to land in a ghost town and if they want to survive, Lauren and former air force pilot Kent Garland must catch the killer in their midst. *Hidden Legacy* by Lynn Huggins Blackburn: When Caroline Harrison and her adopted son are targeted by someone, after the baby she'll do anything to protect him, even if it means turning to her high school crush, detective Jason Drake for help. *Deadly Memories* by Mary Alford: With no memories of her past and a child to protect, Ella Weiss doesn't know what to do. Trust CIA agent Kyle Jennings's offer of help or her captor's claim that the only way to save the child is to kill Kyle.

To save her child, arriving home with the baby, she's adopting Caroline Harrison finds her house vandalized and an intruder intent on shooting her. She's saved when police sirens approach, but all signs point to the little boy as the true target and the assailant won't give up. Now she has to rely on detective Jason Drake, the man who once broke her heart, to figure out why someone's after her soon-to-be adoptive son. Reunited after thirteen years apart, Jason can't help but hope their love might be rekindled, but Caroline and her son's safety come first because if he wants a chance at a future and a family with them, they have to outrun a hit man.

*The Whirlwind* by Eden Phillpotts: A mesmerizing tale that captures both the beauty and brutality of nature. Phillpotts' descriptions are breathtaking and the characters feel deeply real. A masterpiece of storytelling, the atmospheric setting of Devonshire is so vividly described that I felt transported there. The tension between human drama and natural forces made for a gripping read. Some slow moments, but overall an excellent novel. A beautifully written book with strong characters and a compelling plot. The themes of love and betrayal are handled masterfully. I only wish there were more exploration of certain character arcs. An engaging read with rich descriptions and strong emotions. However, the pacing was uneven at times, making it difficult to stay fully immersed. Still, a solid book for those who enjoy classic literary fiction. Phillpotts' writing is absolutely stunning. The way he weaves together the forces of nature and human passion is nothing short of brilliant. A must-read for anyone who loves literary adventure and deep thought-provoking themes.

The 1980s was a decade of enormous global change. Upheaval from the top of governments to the bottom of societies saw a new world order begin to emerge. A new form of capitalism redefined global economics on both the right and left as market forces were unleashed. The ideological conflict of the previous four decades petered out as superpower relations improved. A more interconnected world introduced new consumer products and forms of popular culture to societies across the globe. And protest movements saw new battles fought and new alliances forged in an increasingly interdependent world. *The Routledge Handbook of the Global 1980s* brings together

specialists from across the world to examine how the decade was shaped by these changes to politics economics culture societies and protest movements the handbook is divided into five parts focusing on the global environment globalisation and neoliberalism politics and society culture and society and the closing stages of the global cold war by taking an international approach to the history of the 1980s this book offers a wide ranging and important new perspective of this hugely transformative decade it will appeal to students and scholars alike as well as all those interested in the political social economic and cultural shifts of the 1980s

introduction energy is necessary for a number of reasons the most basic and obvious involve the preparation of food and the provision of heat to make life comfortable or at least bearable subsequently a wide range of technological uses of energy have emerged and been developed so that the availability of energy has become a central issue in society the easiest way to acquire useful energy is to simply find it as wood or a hydrocarbon fossil fuel in nature but it has often been found to be advantageous to convert what is simply available in nature into more useful forms and the processing and conversion of raw materials especially petrochemicals have become a very large industry wood has been used to provide heat for a great many years in some cases it can be acquired as needed by foraging or cutting followed by simple collection when it is abundant there is relatively little need for it to be stored however many societies have found it desirable to collect more wood than is immediately needed during warm periods during the year and to store it up for use in the winter when the needs are greater or its collection is not so convenient one can still see this in some locations such as the more remote communities in the alps for example one might think of this as the oldest and simplest example of energy storage
