amidst a sometimes confusing barrage of news about the middle east dr bernard sabella a palestinian christian offers an enlightening often humorous personal narrative accompanied by reflections on lessons learned from his life in a conflict zone displaced from his home in

infancy with his refugee family and educated in Jerusalem's old city before pursuing university studies in the US. He blossomed into a committed educator, scholar, member of the Palestinian parliament and director of a church aid agency throughout his life. Dr Sabella has never lost his focus on the goal of promoting peace through understanding and he has never been diverted from his path of absolute nonviolence. A life worth living speaks with a voice worth listening to alternately anecdotal and analytical, touching our hearts while pondering the past, present and future of the Holy Land.

The global race for implementing 5G mobile technologies has seen countries riding a new wave of wireless technologies. 5G, the next generation of mobile technologies, can enable a significantly higher level of performance over 4G mobile communications, providing a new layer of connectivity to support innovative data-intensive applications with the estimated impact of 5G on global gross domestic product to be in the trillions of US dollars. 5G's deployment will drive innovation, job creation, worker productivity and competitiveness across various sectors. Several use cases are already being tested and deployment is under way in many countries. For some countries, 5G may seem a distant future prospect given the costs of infrastructure deployment and the need for expensive handsets. For other countries, 5G is an on-ramp to Industry 4.0 and has been folded into national strategy planning. 5G trials, pilots and commercial deployments have been progressing around the world, but most deployments are in higher income countries. Significant barriers remain for developing countries, many of which pertain to the challenges faced by the broader telecommunications sector and all of which threaten to further widen the digital divide and limit access to the economic opportunities that 5G connectivity enables. What does this reality mean for developing countries and how can national governments prepare the path to 5G in the developing world? Planning ahead for a smooth transition surveys the technical capabilities of 5G and explores how countries can reach connectivity goals by using 5G as a layer of connectivity along with 4G and other technologies. This report also provides a guide for policy makers to better understand the opportunities, challenges and risks posed by 5G so that they can plan for a policy and regulatory ecosystem that supports the path to advanced mobile network deployment, access and adoption.

An approachable overview of the nature, purpose and functional roles of chaplaincy, chaplaincy is unlike any other kind of ministry. It involves working outside a church without a congregation, usually in a secular organization. It requires ministering to those with starkly different religious convictions, many of whom may never enter a house of worship. It is, as Alan Baker writes, ministry in motion. Those who are embarking upon this unique and specialized call deserve equally unique and specialized guidance. Foundations of Chaplaincy offers exactly that. Baker surveys the biblical and theological foundations of chaplaincy before enumerating four specific responsibilities and skills that define chaplaincy's ministry of presence: providing, facilitating, caring and advising. Baker's thorough guidance on these matters is supplemented in sidebars with practical advice and anecdotes from over thirty chaplains currently serving in a variety of settings and organizations: chaplains who serve in healthcare, the military,

correctional institutions police and fire departments sports teams college campuses and corporations have essential roles to play in their respective organizations but theirs is rarely an easy calling with foundations of chaplaincy as an introduction and an ongoing reference those called to this important vocation may be assured of having the tools they need to cultivate a strong mission driven pastoral identity rooted in their own theological tradition while simultaneously participating in a multi faith team

how has domestic life been reorganised to accommodate the new u s imperial ambitions what are the consequences of empire for the people living here at home this new collection of essays answers these questions by exploring the cultural political and economic shifts that are now under way in the united states encouraging a radical rethinking of what the country is today this book highlights the connection of u s imperial strategies to the production of insecurity uncertainty and deepening inequality at home rethinking america also explores the instabilities and contradictions of the new imperialism from the unique vantage point of the newly emerging u s homeland comprised of work from leading figures in the field of u s ethnography this book is essential reading for anyone interested in understanding the changes taking place in the united states in the early years of the twenty first century

mass incarceration is one of the most pressing ethical and political issues of our time in this volume philosophers join activists and those incarcerated on death row to grapple with contemporary u s punishment practices and draw out critiques around questions of power identity justice and ethical responsibility this work takes shape against a backdrop of disturbing trends the united states incarcerates more of its own citizens than any other country in the world a disproportionate number of these prisoners are people of color and today a black man has a greater chance of going to prison than to college the united states is the only western democracy to retain the death penalty even after decades of scholarship statistics and even legal decisions have depicted a deeply flawed system structured by racism and class oppression motivated by a conviction that mass incarceration and state execution are among the most important ethical and political problems of our time the contributors to this volume come together from a diverse range of backgrounds to analyze critique and envision alternatives to the injustices of the u s prison system with recourse to deconstruction phenomenology critical race theory feminism queer theory and disability studies they engage with the hyper incarceration of people of color the incomplete abolition of slavery the exploitation of prisoners as workers and as raw material for the prison industrial complex the intensive confinement of prisoners in supermax units and the complexities of capital punishment in an age of abolition the resulting collection contributes to a growing intellectual and political resistance to the apparent inevitability of incarceration and state execution as responses to crime and to social inequalities it addresses both philosophers and activists who seek intellectual resources to contest the injustices of punishment in the united states

for all the debates about black males and their role in american society there has been little attention to a dangerous and growing trend the overprescription of ritalin and other behavioral drugs this book reveals how and why black males are disproportionately targeted and

controlled by american schools in ways that hamper and endanger their educational success fitzgerald shows how the government medical practitioners and the pharmaceuticals industry have facilitated this oppressive trend setting it against a larger historical backdrop of racism in american education
