this is a competently edited reader friendly publication which fills a previously empty niche in the market every applied

psychologist should have a copy well within arm's length. British Journal of Educational Psychology applied psychology current issues and new directions is an exciting new textbook and a perfect resource for students taking either a focussed degree in applied psychology or a module as part of a wider psychology degree program. Given its breadth of coverage it should also be essential background reading on courses looking in depth at one of the many areas of professional psychological practice. The book is divided into two parts. In part one the book reviews the traditional branches of applied psychology i.e. clinical, educational and occupational psychology, some relative newcomers counselling psychology, forensic and health psychology and some less obvious areas careers guidance counselling academia addressing such issues as training, future trends and developments within each field. Part two offers discussion of more generic issues facing professional psychologists including the role of research and evidence based practice in everyday work, trends in higher education and continuing professional development. The book concludes with a round table discussion involving leading psychologists commenting on trends and new directions in their respective fields. Key features of this book consistently pedagogical throughout: chapter summaries, questions for reflection and discussion and annotated further reading in every chapter. Comprehensive coverage all areas of applied psychology included related to the real world by reviewing the issues and offering practical advice. This text should help prospective applied psychologists make informed decisions about their careers.

Leading Canadian scholars cover a wide range of topics spanning the applications of psychology in both criminal and civil areas of law. An authoritative introduction to law and psychology for a Canadian audience.

For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology, behavioral medicine and clinical psychology. From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology. I have repeatedly used an analogy to Newell and Simon's general problem solver program of the late 1950s and early 1960s which had two major functional parts. In addition to the executive component one was the problem solving core, the procedural competence, the other was the representation of the problem environment. In the analogy the concepts, knowledge and techniques of psychology constitute the core competence, the health system in all its complexity is the problem environment. A health psychologist is one whose basic

competence in psychology is augmented by a working knowledge of some aspect of the health system quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system i hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition joseph matarazzo has said that there are no specialties in psychology cited in the editors preface to this book

forensic psychological assessment in practice case studies presents a set of forensic criminal cases as examples of a scientist practitioner model for forensic psychological assessment the cases involve a number of forensic issues such as criminal responsibility violence risk assessment treatment planning and referral to long term forensic care likewise different types of offenses are covered for example sexual offending arson homicide robbery and domestic violence the authors address a variety of mental disorders including psychosis posttraumatic stress disorder psychopathy and other personality disorders the book will be useful for novice and experienced forensic psychologists and psychiatrists who are looking for case studies that integrate the most recent empirical evidence with psychological test findings
