this book fills the gaps in formula 1 records the 70 years of f1 can be neatly divided into two eras at january 1980 at that point the terms grand prix and world championship became synonymous until then over half of f1 races were not included in the championship for the spurious reason that each country should have just a single race this does a disservice to the achievements of drivers of the fangio moss clark and stewart era and even more so to the four pre championship years which began in 1946 when a commentator says rosberg s 16th win equals the f1 wins of stirling moss this is manifestly untrue if the same drivers in the same cars compete at the same tracks and over a similar distance then each race deserves to have its place in the records as a championship quality event this book includes such races alongside contemporary championship races and combined with known figures since 1980 produces what can surely be accepted as the real score of formula 1
