Chu Hsi 1130-1200 exerted a lasting influence on the thought and life of the Chinese in subsequent centuries. The core of his synthesis was moral and social philosophy but it also included knowledge about the natural world. His doctrine of *ke wu* (investigation of things) made him mindful of the specialized knowledge in such scientific traditions as astronomy, harmonics, medicine, etc. This study of Chu Hsi's thought gives a systematic account of the basic concepts of his natural philosophy. It also discusses Chu Hsi's actual knowledge about the natural world and examines the relation between Chu Hsi and Chinese scientific traditions and compares his natural knowledge with that of the Western scientific tradition.

contains articles that provide medical information about a wide variety of common diseases, disorders, tests, and treatments arranged alphabetically from G to M and includes cross references, definitions of terms, and lists of resources.

This innovative textbook teaches the basics of drug information, literature evaluation, and biostatistics and relates these topics to evidence-based pharmaceutical care. Readers will learn what to look for in studies, how to critique them, and how to apply them in clinical pharmacy practice. A major focus is critical appraisal of evidence derived from different types of studies: cases, cohorts, surveys, randomized controlled clinical trials, pharmacoeconomic studies, and systematic reviews. Concluding chapters discuss clinical decision making using evidence from studies.
