aids in the world vol 1 published in 1992 was the first full analysis of mankind's global confrontation with this disease the aids scene however has been changing so rapidly that the need for a second volume was felt much earlier than expected in aids in the world ii the authors extend the international comparisons from 38 countries to the entire world and show that the aids pandemic has become increasingly fragmented within the world population they present data that takes the discussion beyond the current understanding of the vulnerability of nations and communities to the worldwide spread

of hiv engaging in a detailed exploration of the social strategies that have enabled individuals to avoid infection mann and tarantola chart a course into the future based on an incisive investigation of the global pandemic and response the crucial lessons learned from the first decade and their expert understanding of the scientific and social dimensions of the hiv challenge the authors explain how the variety of reactions to the pandemic has contributed to a more advanced awareness of our vulnerability to hiv aids and offer a blueprint for an expanded global prevention effort intended to serve the information needs of all professionals involved in aids research and care this volume s accessibility and clarity of writing make it highly suitable for the general reader as well

hearing on the spread of the hiv aids virus which has become the no 1 killer of people aged 16 45 in most of the world s nations witnesses anthony fauci nat inst of allergy infectious diseases deborah birx u s mil hiv research prog paul de lay chief of hiv aids div u s agency for internat develop peter Piot exec dir unaids nils daulaire pres nat council for internat health global health council peter young hiv opportunistic infections therapeutic develop product strategy glaxo wellcome r d michael merson dean of public health prof dept of epidemiology public health yale univ school of med

essential reading for social and medical scientists and all those interested in infectious diseases and public health aids and the twenty first century examines the social and economic origins and impacts of the hiv aids epidemic hiv aids is not only a medical problem it is an indication of the scale of the global crisis in public health accessibly written this book is necessary reading for policymakers students and all those who are concerned about the relationship between poverty inequality and infectious diseases

during the twentieth century medicine has been radically transformed and powerfully transformative in 1900 western medicine was important to philanthropy and public health but it was marginal to the state the industrial economy and the welfare of most individuals it is now central to these aspects of life our prospects seem increasingly dependent on the progress of bio medical sciences and genetic technologies which promise to reshape future generations the editors of medicine in the twentieth century have commissioned over forty authoritative essays written by historical specialists but intended for general audiences some concentrate on the political economy of medicine and health as it changed from period to period and varied between countries others focus on understandings of the body and a third set of essays explores transformations in some of the theatres of medicine and the changing experiences of different categories of practitioners and patients

this publication presents the results of the three principal and complimentary research projects the findings of the pilot project in zambia in 2003 the key findings of the south african study 2005 and the preliminary findings of the multi country study of six african countries namibia malawi zambia tanzania botswana and senegal the study emphasises that hiv aids is beyond a health crisis a pandemic that encompasses all spheres of life with devastating implications for political legitimacy stability and development in the new democracies in africa today

no single book tracks on an annual basis the evolution of the pandemic its effects and the worldwide response to fill this gap jonathan mann founding director of the world health organization s global program on aids has assembled a team of experts to produce this collection of information data and thinking about aids 100 illustrations

this book has reviews of hhv 6 hhv 8 new hepatitis endogenous and neurological viruses including ms and hrv 1 it describes and analyses progress in understanding persistent virus infections in humans especially hiv it provides a review of all new aspects of hiv including treatment

sub saharan africa is a region devastated by hiv aids the extent of the epidemic is only now becoming clear as increasing numbers of people with hiv are becoming ill in the absence of massively expanded prevention treatment and care efforts the aids death toll on the continent is set to escalate rapidly despite progress being achieved in localized settings the alarming statistics reflect the continuing failure of advanced countries to mount a response that matches the scale and severity of the african hiv aids crisis over and above the colossal personal suffering the dire social and economic consequences for fragile nation states are already being felt not only in health but in education industry agriculture transport human resources and economies in general countries already crippled by drought poverty debt forced migration and civil war must now contend with massive deterioration in child survival rates and life expectancy the erosion of the economic family base massive and insupportable demands on health and public services chronic labour shortages and volatile national security through a critical and detailed exploration of specific case studies this invaluable volume brings together an unparalleled array of international contributors to redefine the political and economic contours of this calamitous epidemic it examines the impact of the shortfalls in the global fund allocation the slow pace of administrative processing of aid and the weaknesses of institutional responses to the crisis from african countries and their partners in the global health community it is essential reading for all concerned with public health epidemiology hiv aids research globalization development africa and

indeed our shared future features include unique assessments of hiv aids and its impact on democracy and governance in african states wide ranging regional and country studies by the foremost thinkers in their fields multi disciplinary contributions from areas including politics sociology public health and development studies compelling and convincing evidence thematic in approach innovative and culturally specific insights for long term planning care and support

traces the history of the epidemic and examines its social political and psychological impact on society

aids poses an unprecedented health and developmental threat the world over including asia ever since it emerged in the early 1980s it has been spreading rapidly across continents and devastating millions of lives in the process it has stretched the health care systems and wrecked the economies and social fabric of many societies developing countries including those in asia which has the second highest number of people living with hiv aids are the most seriously affected in asian countries the problem is compounded by the lack of awareness poverty and inadequate funds and infrastructure this important and comprehensive volume focuses on the epidemiological and programmatic aspects of the hiv aids epidemic in asia the contributors discuss the dynamics and determinants of hiv and cover a wide range of pertinent topics related to prevention care and treatment these include the health economic socio cultural and security dimensions of hiv aids success stories in hiv prevention and care including 100 condom programme antiretroviral treatment and the 3 by 5 initiative management of hiv and sexually transmitted infections drug related hiv hiv vaccine development the role of ngos country specific hiv reports the contributors highlight the lessons learned in asia in responding to the challenge posed by hiv and the success achieved by many countries in addition to hiv prevention facilitating access to care including antiretroviral treatment despite the many problems is now a matter of crucial importance scaling up of innovative approaches proven effective elsewhere is also a matter of great urgency this volume will be invaluable for all those engaged in combating hiv throughout the world in particular it will be of immense use to all those involved in hiv aids control programmes public health professionals health care workers policy makers health administrators as also international agencies and ngos and community based organizations

asia has become the new battle ground for the war against hiv aids the magnitude of the potential public health problems caused by aids in this populous continent may become a catastrophic disaster a 10 rate of prevalence of hiv 1 in india and china alone

would mean more than 200 million people are infected with hiv aids in asia is useful as a comprehensive up to date aids reference book for public health and medical professionals this volume provides concrete information on the diagnosis treatment care prevention and impact of aids part i contains snapshots of hiv aids in asia countries and regions included in this section are thailand india china japan vietnam laos cambodia myanmar malaysia indonesia the philippines pakistan nepal sri lanka hawaii and the pacific islands hong kong and taiwan part ii addresses the molecular epidemiology of hiv aids part iii deals with the diagnosis surveillance and projected scenarios of the aids epidemic part iv outlines prevention efforts and treatment options part v provides an overview of the ongoing collaborative efforts involved in several different nations in the worldwide war against aids this volume will be invaluable to all the public health professionals and researchers working in this field the book is a useful addition to the hiv aids literature aids in asia offers a comprehensive interesting overview of the epidemic there and of general issues that will influence its progression roger detels md ms university of california los angeles the journal of the american medical association book review 293 15
