calls for increased farmer involvement in research and extension programs have been numerous and well supported one approach to integrate the collective knowledge and experience of agricultural scientists and farmers is through whole farm case studies wfcs an interdisciplinary team of 34 research and extension personnel at oregon and washington state universities conducted wfcs of 16 vegetable and small fruit farms beginning in april 1989 the objectives of the oregon washington case study project were to 1 increase farmer involvement in research and education programs 2 develop an interdisciplinary team to address issues of agricultural sustainability in western oregon and washington 3 examine the use of the case study approach in agricultural situations 4 prepare a guide to assist other persons interested in conducting wfcs 5 develop a better understanding of vegetable and small fruit farming systems in the region and 6 identify sustainable agriculture research and education needs in western oregon and washington the wfcs process proved useful in developing an interdisciplinary team and the vast majority of team members participating in the study stated they would consider using the wfcs approach again in their work however the primary constraint cited by all team members was the amount of time required to conduct the study the process of conducting wfcs in western oregon and washington improved communication among a wide group of people team members gained a better understanding of the complexity of farms and identified several areas requiring further research farmers stated they enjoyed participating in the case study project and discovered new information that will assist them in managing their farming systems farmer developed innovations were identified that are useful to other farmers and to the research process included in this thesis are 1 a guide for conducting whole farm case studies 2 a summary of data collected from 16 farms in western oregon and washington participating in the wfcs including a summary of interaction among interdisciplinary team members and 3 a profile of one of the farms participating in the wfcs

background to the study farm level impacts of new technologies the dynamics of technology adoption assessing the benefits of new technologies

in this thesis case studies of four farms over a period of four to ten years are used to examine the extent of financial difficulties during the conversion period to ecological agriculture and the results are placed in the context of other studies and models of the conversion process policies to overcome some of the barriers to conversion are discussed and future research needs inventorized a comprehensive bibliography is included

emerging or black farmers are often considered a homogeneous group while individual emerging farmers and agribusinesses in south africa share a common history the case studies in this book show that in fact significant differences exist among them that are often hidden beneath the averaging and aggregation typical of most analytical research presenting fifteen case studies of emerging agribusinesses in south africa this book has three main objectives 1 to capture the human stories behind the emerging farms and agribusinesses in south africa in order to showcase their rich diversity historical backgrounds current context and future directions 2 to highlight the best practices opportunities and challenges facing south africa s emerging farmers and agribusinesses and 3 to create a new set of instructional materials for academics and development practitioners or as a point of reference for other entrepreneurs members of government and other practitioners engaged in agriculture and agribusiness the case study format a relatively new tool in the field of agribusiness management allows for a close up view of the entrepreneurs at the heart of the businesses providing an ideal lens through which to take a snapshot of the agribusiness landscape of south africa today

building on recent scholarship in the sociology of food claire lamine uses in depth case studies from france and brazil to compile a critical survey of social science approaches to sustainability transitions in agri food systems lamine addresses the diverse pathways of transition encountered across multiple levels from the farm through farmers networks and food chains to the territorial scale of regions she also explores the efforts made by those involved in the agricultural world to create new connections between agriculture food environment and health while also taking social equity issues into account the book adopts a comparative perspective to explore the translation of agroecology into government programmes and the specific modes of governance involved in france and brazil two countries that pioneer in implementing agroecology yet which differ both in visions and context providing new options for understanding the complex issue of agri food transitions this book will make an impact for those studying food systems geography sociology politics and agriculture

examines the social impact of drought and depression in Kansas illustrating how both farm and town families dealt with the deprivation by finding odd jobs working in government programmes or depending on federal and private assistance
