stanley fish is an equal opportunity antagonist a theorist who has taken on theorists an academician who has riled the academy a legal scholar and political pundit who has ruffled feathers left and right fish here turns with customary gusto to the trouble with principle specifically fish has a quarrel with neutral principles the trouble they operate by sacrificing everything people care about to their own purity and they are deployed with equal highmindedness and equally absurd results by liberals and conservatives alike in this bracing book fish argues that there is no realm of higher order impartiality no neutral or fair territory on which to stake a claim and that those who invoke one are always making a rhetorical and political gesture in the end it is history and context the very substance against which a purportedly abstract principle defines itself that determines a principle s content and power in the course of making this argument fish takes up questions about academic freedom and hate speech affirmative action and multiculturalism the boundaries between church and state and much more sparing no one he shows how our notions of intellectual and religious liberty cherished by those at both ends of the political spectrum are artifacts of the very partisan politics they supposedly transcend the trouble with

principle offers a provocative challenge to the debates of our day that no intellectually honest citizen can afford to ignore

the economist kenneth arrow proved in 1951 that a society of diverse individual preferences could only be ordered by dictatorship his impossibility theorem is still an axiom of contemporary welfare economics and has never been seriously challenged the american philosopher john dewey who died in 1952 had claimed that voting and electoral mechanisms do not define democratic self government his broad conception of social conflict addresses preference diversity and resolves arrow's impossibility since the 1980s political scientists have focused on decision through democratic deliberation dewey saw that conversation alone is inadequate for resolution of conflicts in a democracy conflict is accompanied by discourse but preferences are grounded in habits social habits resist adjustment in response to discourse alone but demonstrably adjust in the process of conflict resolution preference conflict is distinguished from marxist and later models as a discovery and transformation process it advances an original updated theory of social conflict in a democracy relevant to today's problematic situations from discrimination to climate change and political polarization
