this volume presents proceedings from the first international curriculum conference by the csmc it features high quality papers from china japan korea and singapore on their centralized mathematics curricula and differentiated education for students around grade 10 or 11 each paper includes an author biography for context

how chinese teach mathematics and improve teaching builds upon existing studies to examine mathematics classroom instruction in china it combines contributions from chinese scholars with commentary from key western scholars to offer a truly systematic examination of some important and distinctive features of mathematics classroom instruction viewing classroom instruction as part of teachers instructional practices this book goes beyond teachers in classroom instructional practice by also examining chinese teachers approaches and practices in developing and improving teaching through this unique approach how chinese teach mathematics and improve teaching expands and unpacks the otherwise fragmented knowledge about chinese practices in developing and carrying out mathematics classroom instruction

the second volume focuses on cases and perspectives in technology intensive mathematics curriculum and tools it includes descriptive cases analyzing the roles of research in development work and chapters addressing research issues and perspectives on technology in teaching and learning mathematics lessons learned can be applied broadly

in an era when corporate and political leaders are using their power to control every aspect of the schooling process in north america there has been surprisingly little research on the impact of textbook content on students the contributors of this volume and its partner the new politics of the textbook problematizing the portrayal of marginalized groups in textbooks guide educators school administrators academics and other concerned citizens to unpack the political social and cultural influences inherent in the textbooks of core content areas such as math science english and social science they urge readers to reconsider the role textbooks play in the creation of students political social and moral development and in perpetuating asymmetrical social and economic relationships where social actors are bestowed unearned privileges and entitlements based upon their race gender sexuality class religion and linguistic background finally they

suggest ways to resist the hegemony of those texts through critical analyses critical questioning and critical pedagogies

this third edition of teaching mathematics for the 21st century continues to help teachers let the secret out to open up to their students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject mathematics the rationale remains the same to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students changing demographics knowledge of how people learn and technology all impact the way we educate our young people this edition incorporates lessons and strategies from programs that have proven success in many types of classrooms many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts although technology is constantly being upgraded ways to increase student motivation through its application remains a goal for example since applets can enhance a lesson whether the teacher uses a computer projector a smart board or has students work individually on computers we have identified several sources of mathematics applets that can be correlated to various lessons research citations and summaries have been updated to reflect current information on teaching and learning for future teachers
