non discrimination is a central obligation under both tax treaty and trade law
however in seeking to strike a balance between national and international
interests its application differs in the two areas of practice this deeply researched
and authoritative work which explains the policy issues and how non
discrimination analysis works provides a comprehensive review of non
discrimination rules in wto and tax treaty law combining a critical commentary
on case law with proposals for an innovative concept for solving cases of

discrimination in tax treaty law among the practical issues affecting non discrimination examined in detail are the following implications that can be drawn from the concepts of non discrimination under wto law and article 24 of the oecd model direct and indirect discrimination and analysis of comparability in wto law and tax treaty law the mfn and nt rules under the gatt and gats the meaning of likeness and less favourable treatment claiming non discriminatory tax treatment before tax administrations and courts under a tax treaty justification of measures against harmful tax competition low taxation and hybrid mismatch arrangements thin capitalisation rules progressive tax rates foreign losses group taxation and relief from juridical and economic double taxation under article 24 of the oecd model and integrating a justification defence into any stage of a non discrimination analysis the author establishes to what extent formal substantive and subjective approaches may be applied in a non discrimination analysis providing the reasons for the approaches taken a two step comparability procedure is applied to selected cases of potential tax discrimination demonstrating how policy arguments can be addressed under article 24 of the oecd model drawing on over a half century of case law in both areas of practice this comprehensive study of the non discrimination rules under wto law and international tax law will be invaluable in systematically solving cases of tax discrimination under article 24 of the oecd model and putting forward arguments at any stage of a wto analysis policymakers will benefit from the author s clear explanation of how national law should comply with international obligations also taxpayers advisers will proceed confidently in claims of tax treaty discrimination and academics will discover an incomparable overview and analysis of anti discrimination rules in international trade law and double taxation conventions

justice in the marketplace in early modern spain examines two late scholastic economic treatises the provechoso tratado de cambios of cristóbal de villalón 1542 and the instrucción de mercaderes of saravia de la calle 1544 it does this in the context of the two principal questions that economic historians pose concerning the economic literature of the spanish late scholastics in general is there a clear link between this literature and modern economic science and does it manifest a free market orientation michael d emic draws two conclusions first there is a palpable relationship between the work of these two authors and modern economic analysis particularly that of financial economics second the authors fundamentally disagreed on most questions mostly concerning the justice of the free market villalón condemns the workings of the market and refuses to allow any possibility that the profit motive may be morally neutral with

considerable clarity he articulates a cost of production theory of value and advocates a system of prices based upon labor and cost and administered by civil authority saravia counters with an elegant expression of the utility theory of value and argues with logical force that prices established by the workings of the market are fundamentally just he allows considerable moral latitude to the pursuit of profit which he regards as spiritually dangerous but not necessarily evil through the lens of their opposing views on economic value the market price and what does or does not constitute the sin of usury the authors with astonishing technical acumen observe analyze and pass moral judgment on a remarkably wide range of complex transactions most of which have counterparts in twenty first century financial markets in the process they tackle problems that still bedevil economists and accountants in our own day such as the difference between a sale and a borrowing the just value of future income flows and the presence of asymmetrical information in pricing the result is a vivid record of the color and texture of early modern economic life that reveals a surprising degree of financial sophistication that the present book makes accessible to the modern reader
