this book provides a thorough evidence base for palliative care provision in the countries of malaysia thailand and the philippines it stimulates a more informed debate and discusses how to improve policy making among intergovernmental and governmental organisations generating intelligence on barriers to development and how to overcome them

hospice and palliative care concepts and practice second edition offers theoretical perspectives and practical information about this growing field contributing authors from a variety of backgrounds working in end of life care present a historical overview of hospice and explain how the interdisciplinary team functions in the hospice setting they then discuss challenges to the team including symptom management death education ethical issues and support groups the future of hospice is addressed in the final part of the book the contributors are experts in community medical care geriatric care nursing care pain management research counseling and hospice management

essentials of palliative care is a to the point clinically oriented resource for all members of the multidisciplinary palliative care team and trainees it covers practical clinical topics including assessment of the patient and pain and symptom management and practical non medical topics central to providing effective palliative care including psychological management guidance on how to help patients and their families through the many healthcare decision points they face and sensitivity to the goals and culture of the patient review questions with detailed answers provide a convenient way for readers to test their knowledge features concise comprehensive clinically focused multiple choice review questions with detailed answers expert contributors from leading institutions coordination of care by palliative care team a major focus

the third edition of hospice and palliative care is the essential guide to the hospice and palliative care movement both within the united states and around the world chapters provide mental health and medical professionals with a comprehensive overview of the hospice practice as well as discussions of challenges and the future direction of the hospice movement updates to the new edition include advances in spiritual assessment and care treatment of prolonged and complicated grief provision of interdisciplinary palliative care in limited resource settings significant discussion of assisted suicide primary healthcare including oncology and more staff and volunteers new to the field along with experienced care providers and those using hospice and palliative care services will find this essential reading

it has been a true pleasure to have had the opportunity to peruse the second edition of palliative care nursing this book authored predominately by uk based experts succeeds in presenting sophisticated thoughts in readily accessible

language each chapter begins with a summary of key points with both classic and new relevant literature well integrated into the text i have also been particularly impressed with the editors final chapter in which they synthesize a number of crucial issues for the future development of palliative care this second edition makes a significant contribution to both the palliative care literature as well as to nursing literature carol tishelman karolinska institutet stockholm sweden i find palliative care nursing a very attractive book for nurses but also for other disciplines to learn about nursing and to learn about palliative care the book is voluminous informative and educationally well constructed frameworks and models in this book will give nurses the opportunity to make up their own process to offer support and be a carer for the incurably ill person and his her family as a skilled companion this book gives the possibility for nurses to spread one clear voice about palliative care nursing congratulations to all the authors martine de vlieger palliatieve hulpverlening antwerpen v z w university of antwerp belgium this book should be compulsory reading for nurses and other health care workers who are involved in the care of people in the final stages of life it provides a comprehensive account of the major issues clinical professional sociological and political that confront contemporary palliative care while also offering strategies to move forward the real world of palliative care is described and critiqued and the rhetoric is dispensed with this book is a vital resource for nursing practice learning and teaching associate professor peter hudson rn phd director of the centre for palliative care research and education st vincent s hospital and the university of melbourne australia this is an excellent book for anyone completing either an academic qualification or who wants to understand the who what and where of palliative care both in the uk and abroad its detail is balanced with case studies and practical illustrations that bring the academic nature of its writing to life for reference purposes for anyone completing academic work it has to be an absolute must nursing times the second edition of this innovative textbook has been extensively revised and updated to reflect new global developments in palliative care this textbook reviews current research and examines the evidence base for palliative care policy and practice over a third of the chapters are newly commissioned from leading international contributors building on the widely acclaimed original edition the textbook focuses on palliative care for adults in a variety of care environments the first three sections use a novel framework the trajectory of life limiting illness to cover key issues including what happens to people as they become ill how individuals cope as they near death and are dying how families and friends deal with bereavement and loss the final section addresses contemporary issues in nursing and inter

professional working the book is written with helpful overviews and in an informative and reader friendly style there are numerous examples of clinical situations and research studies which are examined in depth to illustrate debates in palliative care the textbook spans the range of end of life contexts which are of relevance to practitioners educationalists and researchers palliative care nursing is essential reading for post qualification nursing students and all nurses and health and social care professionals who provide care to people with advanced illness and those who are near the end of life this broad ranging critical text will be invaluable to students and practitioners working with people and their families near the end of life

palliative medicine was first recognised as a specialist field in 1987 one hundred years earlier london based doctor william munk published a treatise on easeful death that mapped out the principles of practical spiritual and medical support at the end of life in the intervening years a major process of development took place which led to innovative services new approaches to the study and relief of pain and other symptoms a growing interest in holistic care and a desire to gain more recognition for care at the end of life this book traces the history of palliative medicine from its nineteenth century origins to its modern practice around the world it takes in the changing meaning of euthanasia assesses the role of religious and philanthropic organisations in the creation of homes for the dying and explores how twentieth century doctors created a special focus on end of life care to comfort always traces the rise of clinical studies academic programmes and international collaborations to promote palliative care it examines the continuing need to support development with evidence and assesses the dilemmas of unequal access to services and pain relieving drugs as well as the periodic accusations of creeping medicalization within the field this is the first history of its kind and the breadth of information it encompasses makes it an essential resource for those interested in the long term achievements of palliative medicine as well as the challenges that remain

annotation offering a blend of holistic and humanistic caring coupled with aggressive management of pain and symptoms associated with advanced disease this resource is organized around 15 competencies in palliative care developed by the american association of colleges of nursing with each chapter outlining specific skills needed to achieve each competency

drawing from his extensive clinical experience and many years of teaching dr hallenbeck has written a guide to palliative care for clinicians topics addressed range from an overview of death and dying to specific approaches to symptom management as an introduction to both the art and science of palliative care this book reflects the perspectives of one physician who has dedicated his career to this rapidly evolving field the book links real stories of illness with practical advice thereby delineating clinical practice in a way that reflects the daily concerns of clinicians

the care of patients with advanced and terminal illness can be extremely rewarding but often causes professionals a considerable amount of discomfort this is especially so when you feel under confident in your abilities to provide a high quality of symptom management and relief from distress and to communicate appropriately with patients patients with advanced disease present some of the most challenging ethical physical psychological and social issues to clinicians and indeed to society patients need us to be knowledgeable skilful and understanding the fully revised and updated new edition of palliative care outlines the fundamental principles and facts which will enable you to make a very real difference to your patients and their families information is provided in an accessible user friendly way and covers a wide range of physical and non physical symptom management multi professional team work is addressed as is the role and support of families there is also a consideration of the dilemmas and decisions that may be encountered by doctors around the end of a patient s life this practical resource designed to provoke contemplative professional development and enhance learning will be essential reading for nursing and medical practitioners and other professionals who support patients in their homes in care homes and in hospital

current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25 30 of people over the age of 85 will show some degree of cognitive decline palliative care for older people a public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that as the global population ages will ever more acutely shape the decisions of policy makers and care givers the book begins by outlining the range of policies towards palliative care for older people that are found worldwide it follows this by examining an array of socio cultural issues and palliative care initiatives from the care implications of health trajectories of older people

to the spiritual requirements of palliative care patients and from the need to encourage compassion towards end of life care within communities to the development of care pathways for older people palliative care for older people a public health perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world the book also highlights the social cultural considerations that influence the difficult decisions that those involved in palliative care face not least patients themselves and offers examples of good practice and recommendations to inspire support and direct healthcare policy and decision making at organisational regional national and international levels

palliative care serves as an innovative practical resource to help equip health social workers with theoretical and clinical tools to integrate palliative care principles into practice with individuals families teams and institutions in honoring the coherence of palliative care and social work authors re awaken the potential of thousands of health social workers to lead and inform the institute of medicine s mandate for high quality humane patient centered family focused care

public health approaches to palliative care have been growing in policy importance and practice acceptance this innovative volume explores the major concepts practice examples and practice guidelines for this new approach the goal of comprehensive care seamless support for patients as they transition between home based care and inpatient services relies on the principles of health promotion and community development both to ensure services are available and importantly appropriate for patients needs in developing contexts where hospitals and hospices may be inaccessible a public health approach provides not only continuity of care but greater access to good end of life care this book provides both a historical and conceptual overview whilst offering practical case examples from affluent and developing contexts in a range of clinical settings finally it draws together research based guidelines for future practice essential reading for public health researchers and practitioners with an interest in end of life care and global health as well as those involved in developing palliative care provision international perspectives on public health and palliative care is the first volume to present an overview of theory and practice in this emerging field

in this far ranging textbook on palliative and end of life care john costello and a team of palliative care specialists take a patient centred approach discussing palliative and end of life care across a range of diseases and illnesses each chapter includes real life case studies that focus on both the patient experience and the experiences of the family members of service users original in its approach to palliative and end of life care adult palliative care focuses on a range of non cancer conditions thoughtfully balancing theory with practice and interprofessional in its scope adult palliative care would benefit any health professional dealing with or working in the field of palliative and end of life care

series editors moira stewart judith belle brown and thomas r freeman as the population in western cultures ages more people suffer chronic ultimately life limiting diseases and medical professionals need to be equipped to cope with the ever growing pressure of palliative care this book gives guidance on how to approach patients with life limiting illness while the problems most people present to the doctor appear relatively straightforward a whole person approach to understanding the complex interaction between the person their illness and their environment should lead to a more complete consideration of the illness and better health outcomes for issues of palliative care such an approach is essential to identify and meet the many needs of desperately ill people palliative care offers a fresh look at the management of patients with international evidence based contributions the book suggests practical and challenging ways to care for the dying it is ideal for all healthcare professionals working in palliative care general practitioners and medicine and healthcare students

taking as its focus a highly emotive area of study the dying process draws on the experiences of daycare and hospice patients to provide a forceful new analysis of the period of decline prior to death placing the bodily realities of dying very firmly centre stage and questioning the ideology central to the modern hospice movement of enabling patients to live until they die julia lawton shows how our concept of a good death is open to interpretation her study examines the non negotiable effects of a patient s bodily deterioration on their sense of self and in so doing offers a powerful new perspective in embodiment and emotion in death and dying a detailed and subtle ethnographic study the dying process engages with a range of deeply complex and ethically contentious issues surrounding the care of dying patients in hospices and elsewhere

do you need a succinct introduction to the key theories and principles of palliative care and their application to practice key concepts in palliative care provides just this in a compact fifty concept guide to the field taking account of the government's end of life care strategy contributors set out the key issues affecting practice across a range of health and social care contexts the book covers topics ranging from dying and death to symptom management and spiritual care backed up with practical examples each entry comprises o a snapshot definition of the topic o key points o a discussion of the main debates o links to practice through thought provoking case histories and o suggestions for further reading key concepts in palliative care is an ideal text and handy source of reference for health and social care professionals who are developing their knowledge and skills in palliative care

this title is directed primarily towards health care professionals outside of the united states content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally particularly the uk nice guidance on supportive and palliative care for people with cancer and the care of the dying pathway it reflects the rapid development of palliative nursing as an emerging specialty it helps in the process of defining palliative nursing and how it interfaces with other disciplines within the specialty the text is divided into three sections and comprehensively yet sensitively covers all aspects of palliative nursing key themes covered include pain control symptom control loss and grief and handling loss a strong emphasis is placed on the integration of theory and practice and evidence based care reconciliation of the theory and practice is achieved by the use of case studies it addresses malignant and non malignant palliative care research and extensive literature support each chapter content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally particularly the uk nice guidance on supportive and palliative care for people with cancer and the care of the dying pathway three new chapters on sexuality care of the dying pathway changing roles of the nurse in palliative care new appendix on north american drug names equivalents for the international market

the long history of medical care for the dying has largely been neglected it began in 1605 when physicians were challenged to enable persons to die peacefully today it includes palliation of oppressive symptoms emotional and psychological care and respect for the wishes and cultural backgrounds of patients and families especially since the

1990s it embraces symptom easing palliation for patients with severe life limiting and chronic illnesses providing a detailed picture of contemporary palliative care this book chronicles four centuries of the quest for a good death covering the fight against futile end of life treatments the history of life extending treatments and technologies the roles of nurses the liberation of the dying from isolation in hospitals and hard won victories to secure patients right to choose

praise for the third edition in this comprehensive textbook on palliative care nursing editors marianne matzo and deborah witt sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence based practice geripal this fourth edition of a comprehensive text reference that has been valued by students educators and practicing nurses for many years palliative care nursing continues to reflect the fundamental hospice and palliative care nursing competencies both basic and advanced that are essential for effective and empathetic care of patients and families this new edition reflects the tremendous growth of this vital discipline into the mainstream of health care and focuses on palliative care that is responsive to the demand for health care reform in america and globally it provides the knowledge scientific evidence and skills needed by nurses to address the complex physical emotional social sexual and spiritual needs of patients and families within the context of a changing health care delivery system with a focus on inter professional collaboration the book emphasizes the value of complementary holistic models in promoting health and wholeness across the illness trajectory even as death approaches the book is edited by project on death in america faculty scholars who have worked to develop implement and evaluate nursing initiatives in palliative care in the u s and internationally with a focus on both quality of life and economic imperatives interdisciplinary authors describe the management of specific diseases and related physical and psychological symptoms and care of patients during the dying process they cover assessment of key symptoms and pharmacological non pharmacological and complementary interventions taking a life span approach the book includes age appropriate nursing considerations key points at the beginning of each chapter and callouts containing evidenced based information highlight best practices the text also examines relevant legal ethical and cultural considerations and offers case studies with conclusions in each clinical chapter new to the fourth edition thoroughly revised and expanded three new chapters addressing palliative care amidst health care reform rehabilitation in chronic or serious illness and post traumatic stress disorder a conceptual

framework table in each chapter identifying the national quality forum domains of palliative care and basic and advanced palliative care and hospice nursing competencies updated evidence based callouts that review the highest quality studies

in the past 35 years the hospice movement has undergone major changes and has grown enormously palliative care is of growing importance to society as our culture struggles with how to provide compassionate end of life care to a growing segment of the population this book provides professionals with a comprehensive overview of the hospice practice as well as the challenges faced by and the future direction of the hospice movement chapters address the fundamentals of hospice and palliative care including key topics such as the goals and importance of community involvement outcome measurement and the manner in which hospices address death grief and bereavement also provided is a detailed analysis of the business side of hospice and offers strategies for proper management for those working in hospice programs that are growing and bringing in new staff and volunteers this book is being published in partnership with the national hospice and palliative care organization nhpco
