supports clinicians in providing the best possible care to patients with serious illness the first comprehensive clinical guide for practicing palliative care and hospice clinicians this evidence based reference is designed to promote best practices in the delivery of safe compassionate patient care with a dual focus on evaluation and intervention the book

covers all aspects of providing palliative and hospice care for vulnerable and diverse populations it provides an overview of common disease manifestations typical trajectories of illness symptom management and recommendations for nursing care written in easy to access outline format the resource is organized by body system and includes common diagnoses encountered in palliative and hospice care individual diagnoses include a definition incidence etiology pathophysiology predisposing factors subjective and objective data diagnostic tests differential diagnoses complications disease modifying treatments palliative interventions symptom management prognosis and nursing interventions the text provides referral guidelines for serious illness as well as general and disease specific hospice care admission guidelines also included are comprehensive tables of diagnostic testing disease specific palliative and symptom management interventions prognostic and screening tools patient teaching and clinician resources and guides to pain management and wound care key features delivers current guidelines for management of symptoms associated with serious illness provides an in depth review of common conditions seen in palliative and hospice care organized by body system for quick information retrieval delivers in depth evidence based and consistently organized disease specific guidelines presents hospice and palliative care management guidelines contains reproducible patient family education handouts reviews procedures commonly used in hospice and palliative practice

intending to fill an important gap in medical training this book presents an easy to learn standardized approach to having compassionate and collaborative goals of care conversations with patients and families a skill that can be difficult for clinicians to learn and that is not part of standard medical education curricula developed by a palliative care provider this is the first book to teach everything clinicians need to know to gently guide patients and families through what can often be difficult discussions about illness disease end of life wishes and hospice care this technique can be used to discuss any medical diagnosis or treatment be employed at any age or stage of an illness and can be used by health care professionals at any level readers will be introduced to the patterns of decline patients follow toward the end of life criteria for recognizing when a patient's time is limited hospice care ground rules for compassionate communication and a step wise method of leading patients and families through difficult goals of care conversations in a collaborative way the book includes specific questions to ask and starter language clinicians can use for developing their own patient friendly talking points about disease progression the end of life concerns that a patient's time is limited advanced directives code status and hospice care an arc of conversation guide for use when learning this technique is also included while modern medicine is terrific at acute stabilization of illness or injury it often ignores the elephant in the room disease progression and death by doing so the healthcare system frequently misses opportunities to align patient wishes with the care they receive furthermore physicians often avoid difficult conversations with patients due to a lack of training or the assumption that hospice care represents medical or personal failure incorporating the material and technique taught in the arc of conversation into everyday practice will enable clinicians to acknowledge and discuss patient decline and to confidently include hospice care as a viable option for treatment that can support patient values wishes and priorities moving toward a continually collaborative approach with patients a shift away from physician directed care to patient centered care will enable clinicians to develop

treatment plans that prioritize outcomes that matter most to patients and families improving patient and family experience of health care across their lives and providing patients with the soft landing they want at the end

the oxford textbook of palliative nursing remains the most comprehensive treatise on the art and science of palliative care nursing available dr betty rolling ferrell and dr judith a paice have invited 162 nursing experts to contribute 76 chapters addressing the physical psychological social and spiritual needs pertinent to the successful palliative care team organized within 7 sections this new edition covers the gamut of principles of care from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond this fifth edition features several new chapters including chapters on advance care planning organ donation self care global palliative care and the ethos of palliative nursing each chapter is rich with tables and figures case examples for improved learning and a strong evidence based practice to support the highest quality of care the book offers a valuable and practical resource for students and clinicians across all settings of care the content is relevant for specialty hospice agencies and palliative care programs as well as generalist knowledge for schools of nursing oncology critical care and pediatric developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill this new edition will continue to serve as the cornerstone of palliative care education

this comprehensive guide thoroughly covers all aspects of neuropalliative care from symptom specific considerations to improving communication between clinicians patients and families neuropalliative care a guide to improving the lives of patients and families affected by neurologic disease addresses clinical considerations for diseases such as dementia multiple sclerosis and severe acute brain injury as well discussing the other challenges facing palliative care patients that are not currently sufficiently met under current models of care this includes methods of effective communication supporting the caregiver how to make difficult treatment decisions in the face of uncertainty managing grief guilt and anger and treating the pain itself written by leaders in the field of neuropalliative care this book is an exceptional well rounded resource of neuropalliative care serving as a reference for all clinicians caring for patients with neurological disease and their families neurologists and palliative care specialists physicians nurses chaplains social workers as well as trainees in these areas

the goal of a high quality cost effective and accessible health care for patients is achieved through constructing a team based and patient centered health care delivery system the expanded role of pharmacists uplifts them to patient care from dispensing and manufacturing or marketing of drugs along with doctors and allied health professionals pharmacists are increasingly recognized as an integral part of the patient care team furthermore colleges of pharmacy need to revise and up date their curricula to accommodate the progressively increasing development in the pharmaceutical education and the evolving new roles of practicing pharmacists in patient care settings this book focuses on the expanded role of the pharmacists in total patient care including prescribing dispensing compounding administering and monitoring of drugs at home hospital community hospice critical care changeover and other care

settings the sector is emerging in both developed and under developed countries overburdened by patient loads and the explosion of new drugs physicians turned to pharmacists more and more for drug information especially within institutional settings and today's patient care pharmacists are taking more interests in medication review and reconciliation patient education and counseling creating drug therapy regimen and monitoring compliance the purpose of this book is to guide the pharmacists in their daily interactions with patients and to ensure collaboration with other health professionals the contents are mostly based on recently published articles related to patient care with most recent ideas and activities followed by the patient care pharmacists around the globe however a pharmacist implements the care plan in collaboration with other health care professionals and the patient or caregiver along with professional guidelines the book discusses the concepts and best practices of patient interaction patient rights and ethical decision making for the professional pharmacist apprentice and student in every chapter the role of pharmacists in that chapter specific issues are detailed explicitly so that a professional pharmacist or a student can figure out his or her do's and don'ts in that specific situation moreover further reading references are listed as future recommendations so the book is an archive of potential references too among so many books about patient care either doctors or nurses roles are highlighted the proposed book highlights the pharmacists roles and responsibilities to the most separated from those of doctors and nurses with the most recent information obtained from most publications in several journals books bulletins newsletter magazines etc
