mobile phone ownership is considerably more ubiquitous than internet access via personal computers more and more people around the world are carrying a tiny mobile device of some kind in their pocket or handbag the environment in which people find and use information is changing we are busier we are constantly on the move and whether we are shopping booking a holiday or looking for train times we expect instant results what does all this mean for libraries the development of networked technologies opened up huge opportunities for libraries to make their resources and services accessible to their users regardless of distance the opportunity to deliver these to users via their mobile phones pdas and other handheld devices will be as significant a challenge indeed if libraries choose to ignore this challenge they are in danger of being left behind in an increasingly competitive world of information provision and services this authoritative collection of contributions from experts in the field based on the first international m libraries conference explores the technical and social context for m libraries describes a range of global initiatives with lessons learned and discusses the potential for future development book jacket

in this book there is no intention to bury or to praise suicide bombers instead the text explores the controversy regarding the double standards prejudice and distortion with the concepts of suicide bombers warriors terrorism and martyrdom frequently the eyes of the beholders and the political religious orientation and loyalties to one s tribe color what someone perceives for example if you carry a bomb in your hand you are called a terrorist but if an f 16 carries bombs and kills civilians the pilot could be labeled a war hero or freedom fighter the contributors of this volume explore the controversial definitions of war crimes and terrorism from both sides eventually declaring that although news and history are written by both the victor and the loser the victor s media has more influence and dominance major motivational elements for suicide

bombers are identified as occupation invasion of the homeland psychic trauma and dissociation religion poverty perceived injustice shame and despair rage and revenge and cultural support the contributors further explore state sponsored terrorism the limiting of civil liberties and the psychological impact of war and terrorism on civilians israeli and palestinian children and western leaders a psychological autopsy of suicide bombers and the uniqueness of female participants as well as the failure of counterterrorism are discussed research on the characteristics of homegrown worriers and warriors in the western muslim population is presented finally the inclusion of treatment methods of psychopharmacology and psychotherapy for traumatized victims of violence help give the reader a broad perspective of the future impact of this very complex topic
