how can we really evaluate teacher effectiveness systems of teacher appraisal and  
evaluation are being created across the world in order to monitor and assess teacher  
performance but do the models used really give a fair evaluation based on international  
research the authors argue that teacher effectiveness is too narrowly conceptualised and  
methods of measuring it are not attuned to the real contexts in which teachers work they  
propose a model of differential teacher effectiveness which takes into account that teachers  
may be more effective with some categories of students than with others teachers may be  
more effective with some teaching contexts than others teachers may be more effective  
with some subjects or components than with others building on and developing previous  
research on models of teacher effectiveness and current theories the authors open up  
possible new debates which will be of interest to academics and researchers working in  
this area throughout the world

an interdisciplinary peer reviewed publication journal of international students print issn  
2162 3104 online issn 2166 3750 is a professional journal that publishes narrative
