contemporaries such as hugh of saint victor and peter abelard its importance lies in the lombard s organization of the theological material his method of presentation and the way in which he shaped doctrine in several major areas despite his importance however there is no accessible introduction to peter lombard s life and thought available in any modern language this volume fills this considerable gap philipp w rosemann begins by demonstrating how the book of sentences grew out of a long tradition of christian reflection a tradition ultimately rooted in scripture which by the twelfth century had become ready to transform itself into a theological system turning to the sentences rosemann then offers a brief exposition of the lombard s life and work he proceeds to a book by book examination and interpretation of its main topics including the nature and attributes of god the trinity creation angelology human nature and the fall original sin christology ethics and the sacraments he concludes by exploring how the sentences helped shape the further development of the christian tradition from the twelfth century through the time of martin luther
