O'Neil National Reading Conference (U.S.) Council for Basic Education Sandra Wilde Albert Ray Lang Delbert Long Grant P. Wiggins Jerome Edward Leavitt Jerome Edward Leavitt James Flood*

teachers have a lot of questions about where standards and tests come from what they mean and how they're used sandra wilde packs this handy reference guide with clear concise explanations of this convoluted and increasingly important world she defines technical terms makes sense of the ethics and politics involved and provides the ammunition to challenge policies relating to testing and standards that aren't benefiting students

the authors first address the history of educational philosophy including john dewey robert hutchins theodore brameld ivan illich and present day educational theorists then they make their case that training teachers to be catalysts of

change can effectively remodel the classroom environment as in the examples from the past

what is assessment and how does testing differ from it why will a move to performance tests by itself not provide us with an adequate system of student assessment how might we better test our tests beyond the technical standards that now apply and why won't increased national testing offer us the accountability of schools we so sorely need in this book grant p wiggins clarifies the limits of testing in an assessment system beginning with the premise that student assessment should improve performance not just audit it wiggins analyzes some time honored but morally and intellectually problematic practices in test design such as the use of secrecy distracters scoring on a curve and formats that allow for no explanation by students of their answers he explains how many test design standards serve technical experts and their needs rather than students and their interests and he discusses how useful and timely feedback is an absolute requirement of any authentic test by showing us that assessment is more than testing and intellectual performance is more than right answers wiggins points the way toward new systems of assessment that more closely examine students habits of mind and provide teachers and policy makers with more useful and credible feedback

jointly sponsored by the international reading assn and the natl council of teachers of english the handbook contains some 70 original articles by authorities in the field of language arts the articles are organized into five sections theoretical bases for english language arts teaching method
