achievers the masters innovators and great ones do not owe their success to luck birth or environment rather great achievers throughout history from michelangelo to einstein madame curie to bill gates colonel sanders to general eisenhower all have characteristics that the authors have distilled into actions for extraordinary success in any field in the process some old notions are put to rest including the saw that innovators must be risk takers in fact they not and that great ideas just happen this book ranges from the importance of preparing for success acquiring expertise to endurance against obstacles and recognizing and then seizing opportunities none of it is easy they say but the rewards can be substantial this fascinating book will be especially helpful for senior executives ambitious managers and entrepreneurs many will find the clarity of its prose and sometimes surprising relevance of the examples and keys inspirational

introduction this is the second book from the lead author raymond perras teaming up with two leadership coaching clients marcel bellefeuille from the world of professional sports and bruno lindia a ceo and business owner raymond has developed a unique and groundbreaking effort to bring forward some issues that do not often get dealt with in a leadership book based on the concept of peak performance the right stuff in the right amount at the right time tm this work provides a leader with insight into how to maximize results while reducing stress it is not meant to confirm what a leader already knows but rather to serve as a basis to contemplate how a person who leads a team can help create an atmosphere that enables people to exceed expectations on a routine basis tapping their experiences in leading and coaching leaders the authors have shared insights into some of the less glamorous aspects of leadership the goal is to raise a leader s awareness to the fact that the team results can be improved when attention is paid to specific aspects of leadership in order to increase effectiveness the implementation of a thinking process that ensures a continuous effort to seek peak performance ultimately enables everyone to exceed expectations the book provides insight into the state of leadership highlighting the results of research done in 2011 by development dimensions international to guide the reader s focus toward some leadership traps that can torpedo the best efforts to be an effective leader in a three distinct statement approach the 10 chapters each address one of the activities or issues that the authors have identified as mission critical for a leader based on their professional experience through a prioritized list from a brainstorm exercise on usual

traps that can create a barrier to leadership success the authors selected 10 activities that may make or break a leader on the journey to leadership excellence the 10 activities are not in order of priority only proposed as cautionary subjects for the leader who seeks to be effective in leading a team the 10 activities are discussed by each of the authors on the basis of their work experience and are listed as follows in the table of content

- 1 the right stuff in the right amount at the right time in an effort to minimize waste and maximize result the leader is encouraged to make judicious choices in order to have sufficient resources to address the priority issues
- 2 the myth of empowerment reflections are shared on how this term is used extensively but often is not reflected in the actual leadership activities people are said to be empowered but the end result is responsibility without authority delegation is not true delegation
- 3 trust and the boomerang theory this critical quality of a leader is discussed to bring awareness to the fact that a person cannot expect trust if he or she does not trust first in the end results are greatly reduced when trust is not in the mix
- 4 telling the truth the discussion centres on the common difficulty for a leader to tell it like it is in a place where trust is lacking stories are usually made up to cover or twist the truth with a negative impact on the team
- 5 optimize results with joint planning too often projects do not bring the desired end results and expectations are not fulfilled because information is held back or key people are not involved at the planning stage taking the time to listen and involve people usually will optimize results
- 6 clarity of vision leads to success the point is that when a leader is not clear on the shape and form of a successful outcome it is very difficult to provide guidance and leadership in an effective way a clear vision takes time to formulate and a leader will do well to define his vision and share it with the team here we are talking about a vision of how we will work as a team a project s outcome is usually quite clearly define

practical tips and unique insights on self motivation the ten factor listing is based entirely on author s own thoughts the guidelines will help increase level of motivation enabling one to be more productive the content also has the potential for making readers reassess their worldview another key benefit could be achieving higher levels of motivation while at the same time gaining peace of mind and solace which in turn could increase one s ability to achieve yet greater levels of motivation serving as a valuable self reinforcing mechanism each of the ten factors is dealt with in a three step process

first the factor is defined second its link with motivation is explained third detailed practical tips are given to help reader adopt the required skill

dr doug graham has taken the increasingly popular and tremendously successful low fat plant based diet and turbo charged it for unprecedented off the charts results eclipsing even the astounding benefits so well documented by renowned health professionals who also advocate low fat eating dr graham s plan is the first to present a low fat diet and lifestyle program based exclusively around whole fresh uncooked fruits and vegetables from effortless body weight management to unprecedented vibrant health and disease reversal to blockbuster athletic performance the 80 10 10 diet delivers in ways no other plan can even hope to match but instead of reading our own tireless advocacy here are stories of 811 success from around the world

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

this book is a very practical yet interesting guide to the research process at the postgraduate level written for the master s degree student in education psychology and allied fields it may also be used in doctoral programs such as clinical psychology where research is not emphasized but a dissertation is required one of the features which makes ten steps unique among research texts is the use of student research throughout the book an up to date description of how computers have affected the research process as well as detailed instructions allow a computer novice to become a competent data analyst without additional computer books includes a series of 10 steps detailing all phases of the research process specific examples of quantitative analyses with precise instructions in the use of spss the statistical package for the social sciences as well as original research by the author on topics such as early childhood sexual and religious attitudes and behaviors

the purpose of the monograph is to provide empirical data about mathematics achievement of secondary students in australia in 1964 and 1978 the data were drawn from australia wide surveys conducted at two levels 13 year old students and year 12

mathematics students the tests used for surveys were originally prepared by the international association for the evaluation of educational achievement iea for cross national studies of achievement in mathematics in addition to measuring mathematics performance the studies analysed the mathematics curriculum in order to demonstrate how the changes in performance were linked to the changes in curriculum and in other aspects of the educational system there was a slight decline in mathematics performance from 1964 to 1978 at the 13 year old level at the year 12 level the performance increased in spite of increases in student participation rates at this level

to describe a tried proven and practical system to recruit interview and select personnel successfully
