sir john soane s influence on architecture from 1791 a continuing legacy is the first in depth study of this eighteenth century british architect s impact on the work of others extending globally and still indeed the case over 200 years later author oliver bradbury presents a compelling argument that the influence of soane 1753 1837 has persevered through the centuries rather than waning around the time of his death through examinations of internationally renowned architects from benjamin henry latrobe to philip johnson as well as a number of not so well known soanean disciples bradbury posits that soane is perhaps second only to palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism previous investigations have been limited to focusing on soane s late georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries through this survey bradbury demonstrates that soane s influence has been truly international in the pre modern era reaching throughout the british isles and beyond to north america and even colonial australia through his inclusion of select detailed case studies bradbury contends that soane s is a continuing not negated legacy in architecture

volume addresses the specific contemporary challenges and tasks that architecture faces it formulates these tasks looking specifically at how architecture is seeking to organize and articulate the complexity of post fordist network society the volume explicitly addresses how current architecture can upgrade its design methodology in the face of an increasingly demanding task environment characterized by both complexity and novelty architecture s specific role within contemporary society is explained and its relationship to politics is clarified finally the new global style of parametricism is introduced and theoretically grounded
