scholarship on plato s dialogues persistently divides its focus between the dramatic or literary and the philosophical or argumentative dimensions of the texts but this hermeneutic division of labor is naïve for plato s arguments are embedded in dramatic dialogue through complex largely informal exchanges between literary characters consequently it is questionable how readers can even attribute arguments and theses to the author himself the answer to this question lies in transcending the scholarly divide and integrating the literary and philosophical dimensions of the texts this is the task of trials of reason the study focuses on a set of fourteen so called early dialogues beginning with a methodological framework that explains how to integrate the argumentation and the drama in these texts unlike most canonical philosophical works the early dialogues do not merely express the results of the practice of philosophy rather they dramatize philosophy as a kind of motivation the desire for knowledge of goodness they dramatize philosophy as a discursive practice motivated by this

desire and ideally governed by reason and they dramatize the trials to which desire and reason are subject that is the difficulties of realizing philosophy as a form of motivation a practice and an epistemic achievement in short trials of reason argues that plato s early dialogues are as much works of meta philosophy as philosophy itself

this volume of new essays focuses on the increasing relevance of intergenerational ethics to key challenges of the 21st century such as climate change rapid technological change the expanding human population and threats of extinction it features philosophers and political theorists of international standing providing a cutting edge perspective on these issues
