this is the first book to connect the concepts of active learning and deep learning and to delineate theory and practice through collaboration between scholars in higher education from three countries japan the united states and sweden as well as different subject areas education psychology learning science teacher training dentistry and business it is only since the beginning of the twenty first century that active learning has become key to the shift from teaching to learning in japanese higher education however active learning in japan as in many other countries is just an umbrella term for teaching methods that promote students active participation such as group work discussions presentations and so on what is needed for students is not just active learning but deep active learning deep learning focuses on content and quality of learning whereas active learning especially in japan focuses on methods of learning deep active learning is placed at the intersection of active learning and deep learning referring to learning that engages students with the world as an object of learning while interacting with others and helps the students connect what they are learning with their previous knowledge and experiences as well as their future lives what curricula pedagogies assessments and learning environments facilitate such deep active learning this book attempts to respond to that question by linking theory with practice

designing interaction first published in 1991 presents a broadbased and fundamental re examination of human computer interaction as a practical and scientific endeavor the chapters in this well integrated tightly focused book are by psychologists and computer scientists in industry and academia who examine the relationship between contemporary psychology and human computer interaction hci seeks to produce user interfaces that facilitate and enrich human motivation action and experience but to

do so deliberately it must also incorporate means of understanding user interfaces in human terms the province of psychology conversely the design and use of computing equipment provides psychologists with a diverse and challenging empirical field in which to assess their theories and methodologies

this is a book to be experienced not simply read the alchemy of becoming series sets out a methodology that empowers you to raise your level of consciousness to levels never imagined possible the first book and level of this process being of truth laid a foundation of authenticity and personal truth in this second installment being of love the journey continues as you discover that love is not just a feeling or emotion but rather a powerful life enhancing and life creating force level 1 reframed fear to trust in level 2 love is claimed over and beyond fear this is transformation not just inspiration but transformation to a state of higher consciousness available to us all einstein claimed that no problem can be solved from the same level of consciousness that created it it is only in higher consciousness that the intractable issues of our times can be addressed this applies equally to our individual lives be it our health relationships and to our sense of worth and well being higher consciousness takes you from life happening to you to life happening by you and expressed as you the seven stage alchemic process is the framework for transformation and while the process is universal no two people will have the same experience the experience is personalized to you meaning that it is aligned to your unique vibrational makeup this is a powerful affirming aspect of this methodology as what is revealed to you can only be known by you it all starts with you transforming yourself to be the alchemist of your own life while serving as a gateway for the change our world so desperately needs
