governance has become one of the most commonly used concepts in contemporary political science it is however often used to mean a variety of different things this book helps to clarify this conceptual muddle by concentrating on one variety of governance interactive governance the authors argue that although the state may remain important for many aspects of governing interactions between state and society represent an important and perhaps increasingly important dimension of governance these interactions may be with social actors such as networks with market actors or with other governments but all these forms represent means of governing involving mixtures of state action with the actions of other entities this book explores thoroughly this meaning of governance and links it to broader questions of governance in the process of explicating this dimension of governance the authors also explore some of the more fundamental questions about governance theory for example although governance is talked about a great deal political science has done relatively little about how to measure this concept likewise the term multi level governance has become widely used but its important to understand that idea more fully and see how it functions in the context of interactive forms of governance the authors also link governance to some very fundamental questions in political science and the social sciences more broadly how is power exercised in interactive governance how democratic is interactive

governance and is democratic governance always advanced through transparency

jon pierre and guy peters expertly guide the reader through governance one of the most widely used terms in political science and its differing interpretations with comprehensive discussion of the key issues covering global as well as local level governance a detailed look into what constitutes good governance whether produced by a government or by more informal means is also explored

focusing on computational intelligence this text covers topics on architecture of learning technology systems advanced uses of multimedia and hypermedia integrated learning environments application of ai tools in learning technology and virtual reality
