jean baudrillard is one of the outstanding representatives both of french poststructuralism and postmodernism because of radical criticism it was not possible for him to establish a logically coherent theoretical system the philosophical aspects of his work are specifically merged therefore into a critical asystematic fragmentarism which is the subject of this work from the critique of the political economy of the sign through critiques of rationalism reality progress truth history to the theory of simulation

baudrillard s specific para concepts fatal strategy symbolic exchange seduction hyperreality pataphysics etc are constantly fragmentarily present in the development of his thought these concepts are baudrillard s attempt at disengagement from modern philosophy and his new unsystematic postmodern view of reality in general in the analysis of binary metaphysical oppositions reality simulation subject object knowledge seduction history end radical irradical nihilism metaphysics god pataphysics baudrillard is radically exclusive through the arbitrary preference of one over the other concept his ideas it is possible to conclude that these dualistic antagonisms are also paradoxically compatible in his system this compatibility is very close to the irrational mysticism of this thinker this book is a clear and lucid presentation of this unique brand of postmodernism to english speaking scholarship
