industrial inorganic chemistry adds to the previously published  
graduate level textbooks on industrial chemistry by mark a  
benvenuto it focuses specifically on inorganic processes from the  
largest industrial process for the production of major inorganic  
chemicals and metals down to and including smaller niche  
processes that have become extremely important in maintaining the  
current quality of life the book provides a survey on the  
production of essential elements and compounds such as sulfuric  
acid calcium carbonate fertilizers as well as numerous metals and  
alloys in addition to the fundamental scientific principles each  
chapter includes discussions on the environmental impacts mining  
of raw materials creation of by products pollution and waste  
generation all of which have become key factors for the potential  
implementation of greener methods the author also highlights ways  
in which industry has begun to make industrial inorganic  
processes more environmentally benign examines major inorganic  
chemistry processes their effect on every day life and current  
efforts to improve processes or adapt green chemical production  
provides didactic links between theoretical lecture contents and  
current largescale chemical processes valuable for students of  
inorganic chemistry industrial chemistry chemical engineering and

materials science
