logic functions and equations are some of the most important concepts of computer science with many applications such as binary arithmetics coding complexity logic design programming computer architecture and artificial intelligence they are very often studied in a minimum way prior to or together with their respective applications based on our long time teaching experience a comprehensive presentation of these concepts is given especially emphasising a thorough understanding as well as numerical and computer based solution methods any applications and examples from all the respective areas are given that can be dealt with in a unified way they offer a broad understanding of the recent developments in computer science and are directly applicable in professional life logic functions and equations is highly recommended for a one or two semester course in many computer science or computer science oriented programmes it allows students an easy high level access to these methods and enables sophisticated applications in many different areas it elegantly bridges the gap between mathematics and the required theoretical foundations of computer science

the greatly expanded and updated 3rd edition of this textbook offers the reader a comprehensive introduction to the

concepts of logic functions and equations and their applications across computer science and engineering the authors approach emphasizes a thorough understanding of the fundamental principles as well as numerical and computer based solution methods the book provides insight into applications across propositional logic binary arithmetic coding cryptography complexity logic design and artificial intelligence updated throughout some major additions for the 3rd edition include a new chapter about the concepts contributing to the power of xbole a new chapter that introduces into the application of the xbole monitor xbm 2 many tasks that support the readers in amplifying the learned content at the end of the chapters solutions of a large subset of these tasks to confirm learning success challenging tasks that need the power of the xbole software for their solution the xbole monitor xbm 2 software is used to solve the exercises in this way the time consuming and error prone manipulation on the bit level is moved to an ordinary pc more realistic tasks can be solved and the challenges of thinking about algorithms leads to a higher level of education

for the first time unique sets of data from china are published and compared with climatic changes in other parts of the world further statistical thermodynamic dynamic and stochastic models and experimental results are presented
