the telecommunications industry has experienced dynamic changes over the past several years and those exciting events and developments are reflected in the chapters of this volume the telecommunications policy research conference tprc holds an unrivaled place at the center of national public policy discourse on issues in communications and information tprc is one of the few places where multidisciplinary discussions take place as the norm the

papers collected here represent the current state of research in telecommunication policy and are organized around four topics competition regulation universal service and convergence the contentious competition issues include bundling as a strategy in software competition combination bidding in spectrum auctions and anticompetitive behavior in the internet regulation takes up telephone number portability decentralized regulatory decision making versus central regulatory authority data protection restrictions to the flow of information over the internet and failed global information infrastructure initiatives universal service addresses the persistent gap in telecommunications from a socioeconomic perspective the availability of competitive internet access service and cost modeling the convergence section concentrates on the costs of internet telephony versus circuit switched telephony the intertwined evolution of new services new technologies and new consumer equipment and the politically charged question of asymmetric regulation of internet telephony and conventional telephone service

wireless personal communications or wireless as it is now being called has arrived the hype is starting to fade and the hard work of deploying new systems and services for personal communications is underway in the united states the fcc propelled the wireless era from infancy to mainstream with a 7.7 billion auction of 60 mhz of radio spectrum in the 1800-1900 mhz band with the largest single sale of public property in the history of mankind mostly complete the resources of the entire world are being called upon to develop inexpensive rapidly deployable wireless systems and subscriber units for an industry that is adding subscribers at greater than 50 annual rate this growth is commonplace for wireless service companies throughout the world and in the u s where as many as 7 licensed wireless service providers may be competing for cellular/fpcs customers within the next couple of years differentiators in cost quality service and coverage will become critical to customer acceptance and use many of these issues are discussed in the papers included in this book
