The Pimsleur method: we make no secret of what makes this powerful method work so well. Paul Pimsleur spent his career researching and perfecting the precise elements anyone can use to learn a language quickly and easily. Here are a few of his secrets: the principle of anticipation, in the nanosecond between a cue and your response, your brain has to work to come up with the right

word having to do this boosts retention and cements the word in your mind core vocabulary words phrases and sentences are selected for their usefulness in everyday conversation we don't overwhelm you with too much but steadily increase your ability with every lesson graduated interval recall reminders of new words and structures come up at the exact interval for maximum retention and storage into your long term memory organic learning you work on multiple aspects of the language simultaneously we integrate grammar vocabulary rhythm melody and intonation into every lesson which allows you to experience the language as a living expressive form of human culture learning in context research has shown that learning new words in context dramatically accelerates your ability to remember every scene in every pimsleur lesson is set inside a conversation between two people there are no drills and no memorization necessary for success active participation the pimsleur method active learner participation success this method works with every language and every learner who follows it you gain the power to recall and use what you know and to add new words easily exactly as you do in english the mandarin chinese language over one billion people speak chinese the two most common dialects are mandarin and cantonese they are not mutually intelligible mandarin is the official language in mainland china taiwan and singapore the mandarin dialect is used in most chinese schools and in most tv programs movies and radio stations throughout the country even in guangzhou formerly canton where people speak cantonese in their daily lives mandarin is one of the six official languages of the united nations tech talk cds are formatted for playing in all cd players including car players and users can copy files for use in itunes or windows media player
