find the leading edge in a disrupted world planning our response to disruption seems impossible most new and emerging technologies have been in development for decades but as soon as they land on our doorstep they inspire the shock of the new how do you as a learning professional prepare for what you don't know is coming how do you judge what is important and what is just a fad in shock of the new the challenge and promise of emerging learning technologies chad udell and gary woodill create a new framework for anticipating emerging learning technologies outlining six key perspectives you should consider with any new technology they examine some of the day's most commonly discussed emerging technologies and pose the questions that will point the way to your own strategy these insights aren't limited to specific applications they give you an approach you can apply to any new tech coming your way so you're always braced for the shock of the new udell and woodill optimistically point out that emerging technologies will help us make sense of our increasingly complex world many more changes will occur over the next decade so buckle up what was once science fiction has just become real and now is your opportunity to be on the leading edge

in this paper we study how aggregate output responds to the arrival of a new general purpose technology gpt by looking at adjustment mechanisms that operate through labor markets we show that under a wide set of circumstances the arrival of a new gpt that raises long run output can trigger a recession in the short run furthermore we

characterize features of the gpt that produce a cyclical adjustment path an initial recession occurs whenever a higher education level is required to operate the new gpt but a recession can also occur when the new gpt has lower educational requirements a cyclical adjustment path is more likely when inexperienced workers are less productive with the new technology and the faster productivity rises with experience in the new sector
