This text demonstrates the uses of competent communication in interpersonal conflict, using current research to show effective and appropriate interpersonal management. The first two chapters lay out a conceptual foundation for understanding interpersonal conflict; it then describes the nature of conflict, messages, how different people define and react to conflict, and the consequences, both positive and negative, of conflict interactions. Chapters 7-10 explore conflict in four settings. The text concludes with a look at the conflicts students may face in their lives and the need to adopt an ethical stance in managing conflict.

Extensively updated with expanded and newly added chapters, the second edition of Competence in Interpersonal Conflict continues to present a conceptual framework for why communication competence is central to conflict management. Although no checklist of communication behaviors can guarantee success, the authors offer constructive guidelines that provide a basis for grappling with future conflicts in five unique settings: intercultural, organizational, familial, mediation, and violence in intimate relationships. Within any conflict interaction, adept communicators embrace the notion that adopting an ethical stance is both desirable and practical. Conflict between people is a natural feature of the human condition; when people interact and form relationships, conflicts inevitably emerge. How individuals manage conflict and how they perceive both the opportunities and challenges it provides will define their interpersonal relationships in more ways than any other.
