a stimulating appraisal of a crucial contemporary theme this comprehensive analysis of globalizaton offers a distinctively

cultural perspective on the social theory of the contemporary world this perspective considers the world as a whole going beyond conventional distinctions between the global and the local and between the universal and the particular its cultural approach emphasizes the political and economic significance of shifting conceptions of and forms of participation in an increasingly compressed world at the same time the book shows why culture has become a globally contested issue why for example competing conceptions of world order have political and economic consequences

this book examines the globalization of production and its impact on work and gender relations the impact of technology on workers around the world the economic problems associated with debt crisis the political opportunities associated with democratization the impact of global warming the reasons behind china s rise as an economic superpower and the problems in countries across the middle east that culminated in the attacks of 9 11

the 36th world congress of the international institute of sociology iis was a true milestone in the history of iis for it heralded many firsts the first world congress to be held on the asian continent the first to be held in china and the largest attendance by far of any of the organization s world congresses this book is a compendium of 18 papers presented by plenary speakers from 10 different nations it addresses sweeping issues related to the age of globalization and social change including cultural diversities migration and equality social transformation and national identity notable is an extraordinary diversity of viewpoints approaches and opinions social change in the age of globalization should be especially useful for those interested in learning more about social change in the context of globalization especially in nations whose sociological communities are emerging such as china and many other asian nations

an innovative and forward looking volume which challenges conventional thinking regarding the inevitability of globalisation essential reading for those interested in the development of and the potential alternatives to globalisation

an inspiring collection that uses case studies and theoretical reflection to contextualise the linkages between collective action theories social movement practices and the phenomenon of globalisation all of the perspectives presented will force a rethink of the exact meaning of globalisation and the way in which such insights can be used to advance understanding of basic transformations occurring in the diverse world of the twenty first century

globalisation like no other term has gained in recent years a prominent position in nearly all branches of social science consequently its definitions abound also in economics a discipline to which it has a special relevance in economic terms globalisation is the historical process of gradual yet persistent liberalisation followed by the coalescence of the hitherto largely fragmented markets of goods capital and labour into a single global market the concurrent regional integration processes should by no means be seen as a trend opposed to globalisation which they may even facilitate in some circumstances by moving integration to a higher level from that of national economics up to that of international organisations for instance the eu integrating with nafta asean with cis or mercosur with caricom thus defined globalisation depends on a variety of circumstances and has numerous implications it is an extremely dynamic and complex process which therefore allows of no unambiguous assessment globalisation is an irreversible process although as the experience of the last two or three years has shown its progress can be significantly impeded in the short run by various kinds of political and economic shocks so the idea is to follow an enlightened and wise development strategy and a well co ordinated policy in this case on the international and global scale that would minimise the attendant problems and eliminate as far as possible the concomitant social stress how to achieve this goal is the question the authors address in this volume

contributed papers presented at a seminar held at colombo in oct 1996 with reference to sri lanka

in the last quarter of the twentieth century the global political economy has undergone a profound transformation democracy has swept the globe and both rich and developing nations must compete in an increasingly integrated world economy how are social welfare policies being affected by this wave of economic globalization leading researchers explore the complex question in this new comparative study shifting their focus from the more commonly studied established welfare states of northwestern europe the authors of globalization and the future of the welfare state examine policy development in the middle income countries of southern and eastern europe latin america russia and east asia previous investigations into the effects of globalization on welfare states have generally come to one of two conclusions the first is that a global economy undermines existing welfare states and obstructs new developments in social policy as generous provisions place a burden on a nation s resources and its ability to compete in the international marketplace in contrast

the second builds on the finding that economic openness is positively correlated with greater social spending which suggests that globalization and welfare states can be mutually reinforcing here the authors find that globalization and the success of the welfare state are by no means as incompatible as the first view implies the developing countries analyzed in globalization and the future of the welfare state demonstrate that although there is great variability across countries and regions domestic political processes and institutions play key roles in managing the disruptions wrought by globalization

as our world becomes increasingly interconnected through economic integration technology communication and political transformation the sphere of the family is a fundamental arena where globalizing processes become realized for most individuals family in whatever configuration still remains the primary arrangement that meets certain social emotional and economic needs it is within families that decisions about work care movement and identity are negotiated contested and resolved globalization has profound implications for how families assess the choices and challenges that accompany this process families are integrated into the global economy through formal and informal work through production and consumption and through their relationship with nation states moreover ever growing communication and information technologies allow families and individuals to have access to others in an unprecedented manner these relationships are accompanied by new conceptualizations of appropriate lifestyles identities and ideologies even among those who may never be able to access them despite a general acknowledgement of the complexities and social significance inherent in globalization most analyses remain top down focused on the global economy corporate strategies and political streams this limited perspective on globalization has had profound implications for understanding social life the impact of globalization on gender ideologies work family relationships conceptualizations of children youth and the elderly have been virtually absent in mainstream approaches creating false impressions that dichotomize globalization as a separate process from the social order moreover most approaches to globalization and social phenomena emphasize the western experience these inaccurate assumptions have profound implications for families and for the globalization process itself in order to create and implement programs and policies that can harness globalization for the good of mankind and that could reverse some of the deleterious effects that have affected the world's most vulnerable populations we need to make the interplay between globalization and families a primary focus

for courses in social problems or global issues this volume integrates traditional sociological concepts and insights with an ecological awareness and applies it to the globalization process it takes a dynamic view of globalization as an evolutionary process with a potential for unprecedented transformation of social structure and consciousness

in a political climate where loose talk of a third way passes for political idealism waterman s passionate book examines the possibilities for a new style global solidarity suited to complex capitalist modernity the author examines the past internationalism of labour and socialists and the present one of radical democratic social movements discussing how the left might build on this experience to recover a humanist and emancipatory tradition of internationalism which would address our multiple global social problems

first book to study the intersection of globalization and social exclusion this renowned author has published over 20 books on issues of globalization and development studies author directed the globalization and social exclusion unit at the university of liverpool we inhabit a world of consequences and butterfly effects when global economies integrate what disintegrates as a result the answer ronaldo munck contends is social equality this is the first book to view globalization through the lens of social exclusion defined as all the ways in which people are prevented from obtaining the necessities of life to illustrate how globalization deepens the existing inequities of race place gender and class in both the global north and south the author highlights disparities in living conditions the feminization of poverty and the global sex trade the effects of racism migration and multiculturalism and the formation and political manifestations of social class he boldly develops a politics and ethics of transformation to move us beyond social exclusion even beyond mere social inclusion he provides us with the tools to transform society from within creating a more democratic and just global order

this research handbook takes stock of the state of the art in sociological research on globalization and the contributors outline future trajectories for this one of the most pressing and challenging sociological themes of our time

this book exhibits the characteristics of all good social policy texts it is fired by a commitment to welfare it is informed by extensive multidisciplinary scholarship it debunks fashionable myths nicola yeates argues convincingly that while globalization in its many manifestations and dimensions economic cultural and political has to be built into the analytical

framework used by social policy scholars globalizing pressures are not immutable nor guaranteed success in overriding local and national social and political forces essential reading on all social policy courses bob deacon professor of social policy university of sheffield stakes finland many social scientists have not yet woken up to the fact that globalization has transformed the nature of social policy the severity and the causes of many problems are harder to pin down research and teaching programmes have to be re cast this book offers a penetrating assessment of the changes that have to be made peter townsend professor of international social policy lse this timely textbook critically evaluates the relevance and implications of globalisation in relation to both the academic study of social policy and social welfare provision globalisation and social policy examines the implications of globalization for social policy analysis and provision analyses how social policies and politics contribute to and shape globalizing strategies argues that the degree to which globalization gives rise to systematic changes in the funding regulation and provision of welfare has been overestimated and demonstrates that national and local forces remain decisive in understanding the development of social policy globalization and social policy provides an invaluable guide to the expanding field it provides a refreshing antidote to victorious and defeatist accounts of globalization and its implications for social welfare and argues that politics matter now as much as they ever did it will be welcomed by all students of social policy and will also be of interest to other social science students engaged in issues of globalization

the world is at the crossroads of social change in the vortex of forces that are bringing about a different world a post neoliberal state this groundbreaking book lays out an analysis of the dynamics and contradictions of capitalism in the twenty first century these dynamics of forces are traced out in developments across the world in the arab spring of north africa and the middle east in cuba and elsewhere in latin america in the united states and in asia the forces released by a system in crisis can be mobilized in different ways and directions the focus of the book is on the strategic responses to the systemic crisis as the authors tell it these dynamics concern three worldviews and strategic responses the davos consensus focuses on the virtues of the free market and deregulated capitalism as it represents the interests of the global ruling class the post washington consensus concerns the need to give capital a human face and establish a more inclusive form of development and global governance in addition to these two visions of the future and projects the authors identify an emerging radical consensus on the need to move beyond capitalism as well as neoliberalism

a rich and compelling analysis of how cultural globalization occurs including the structural conditions personal meanings and social interactions involved

since the 1980s globalization and neoliberalism have brought about a comprehensive restructuring of everyone's lives people are being disciplined by neoliberal economic agendas transformed by communication and information technology changes global commodity chains and networks and in the global south in particular destroyed livelihoods debilitating impoverishment disease pandemics among other disastrous disruptions are also globalization's legacy this collection of geographical treatments of such a complex set of processes unearths the contradictions in the impacts of globalization on peoples lives globalizations contradictions firstly introduces globalization in all its intricacy and contrariness followed on by substantive coverage of globalization's dimensions other areas that are covered in depth are globalization's macro economic faces globalization's unruly spaces globalization's geo political faces ecological globalization globalization's cultural challenges globalization from below fair globalization globalizations contradictions is a critical examination of the continuing role of international and supra national institutions and their involvement in the political economic management and determination of global restructuring deliberately this collection raises questions even as it offers geographical insights and thoughtful assessments of globalization's multifaceted faces and spaces
