a friendly mathematics competition tells the story of the indiana
college mathematics competition icmc by presenting the problems
solutions and results of the first 35 years of the icmc the icmc was
organized in reaction to the putnam exam its problems were to be more
representative of the undergraduate curriculum and students could
work on them in teams participation was originally restricted to the
small private colleges and universities of the state but was later
opened up to students from all of the schools in indiana the
competition was quickly nicknamed the friendly competition because of
its focus on solving mathematical problems which brought faculty and
students together rather than on the competitive nature of winning
organized by year the problems and solutions in this volume present
an excellent archive of information about what has been expected of

an undergraduate mathematics major over the past 35 years with more than 245 problems and solutions the book is also a must buy for faculty and students interested in problem solving the index of problems lists problems in algebraic structures analytic geometry arclength binomial coefficients derangements differentiation differential equations diophantine equations enumeration field and ring theory fibonacci sequences finite sums fundamental theorem of calculus geometry group theory inequalities infinite series integration limit evaluation logic matrix algebra maxima and minima problems multivariable calculus number theory permutations probability polar coordinates polynomials real valued functions riemann sums sequences systems of equations statistics synthetic geometry taylor series trigonometry and volumes
