keynesian economics free market capitalism monetarism game theory and the invisible hand sure you know what

they mean that is you've certainly heard of them but do you know enough about these economic theories to join a dinner party debate or dazzle the bar with your financial knowledge 30 second economics takes the top 50 economic theories and explains them to the general reader in half a minute using nothing more than two pages 300 words and one picture economics will suddenly seem a lot more fun than the economy and make a lot more sense and along the way you'll meet founding fathers of modern economics such as adam smith david ricardo and alfred marshall from marxism to mercantilism plus everything in between this is the ultimate crash course in economic theory

the book compares neoclassical and marxian economics and points out that both the schools of thought seek to analyze how a capitalist society functions the authors show that the neoclassical economics vindicates capitalism and prescribes policies that further the interest of the rich giant capitalists who own most of the non human productive resources of the economy whereas marxian analysis yields the result that a capitalist society is exploitative and crisis prone marxian economics also suggests that the class struggle inherent in a capitalist society will eventually transform it into an equal just and humane socialist society the book also presents keynesian theory which suggests measures that can counter at least some of the crises that marx said a capitalist country is subject to it discusses the current state of the capitalist world the recent crises it was subject to and assesses the three theories in the light of these experiences it recounts the current states of two important socialist states namely china and cuba it discusses the economic performance of soviet union since its birth and explains the reasons for its disintegration it compares economic performances of the capitalist and the socialist states and assesses in the light of the experiences of these two blocs of countries which school of thought is more acceptable and closer to the truth

the long paper which gives the title to this collection and which has never before been published as paperback was initially an attempt to promote international academic understanding the economics department at the london school of economics had arranged a colloquy between two groups of russian and british economists and where the author asked to contribute a general survey of the present state of economic theory as taught in western centers for reasons which are explained in the opening section the author decided to adopt an historical approach and the notes on which the present paper is based were the result the remainders of the papers have as their common denominator a continuing interest in the history of economic thought beginning with a lengthy critique of schumpeter s magisterial history of economic analysis they range from an appraisal of bentham s continuing relevance to a review of robertson s lectures on economic principles with some special attention to john stuart mill both as a human being and as an economist they have been written at various times in the last thirty five years and minute scrutiny if such were thought to be worthwhile which of course it is not might detect some variations of emphasis particularly perhaps in the implicit valuations of marshall and his contribution in the papers on wicksteed and schumpeter s history respectively but in spite of a certain shift of perspective here the author thought it worthwhile to attempt substantial redrafting apart from the correction of obvious inelegances or actual errors the excision of some duplicating quotations and in a few cases the addition of supplementary material and references the papers are reproduced as originally written in each instance the author has given footnote acknowledgements of the place of original publication
