gerber's text offers a principles level introduction to international economics that is accessible to a diverse group of readers. international economics fourth edition uses a rich array of case studies to illuminate economic institutions and policies as well as recent developments in the global economy. the book's flexible approach with self-contained chapters and comprehensive coverage allows instructors to adapt the book easily to a wide range of syllabi without relying on prerequisite knowledge of higher level math. the text helps readers understand the issues and policies they see in the news. introduction and institutions the united states in a global economy international economic institutions since world war ii international trade comparative advantage and the gains from comparative advantage and factor endowments beyond comparative advantage the theory of tariffs and quotas commercial

policy international trade and labor and environmental standards international finance trade and the balance of payments exchange rates and exchange rate systems an introduction to open economy macroeconomics international financial crises regional issues in the global economy economic integration in north america the european union many markets into oâ trade and policy reform in latin america export oriented growth in east asia china and india in the world economy for all readers interested in international economics

a comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format as the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things work beyond the microcosm of the economic needs of a single individual or family unit this expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics written by leading scholars and practitioners the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media each of the volumes includes coverage of important events throughout economic history biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the u s economy throughout history the extensive explanations of major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world

this timely research handbook provides a comprehensive overview and discussion of the substantive competition law provisions of the asean plus three region including hong kong and taiwan taking a unique comparative perspective chapters examine asian competition laws in relation to the existing laws that served as models for them analysing how and why they deviate

over the past decade we have witnessed an apparent convergence of views among competition agency officials in the european union and the united states on the appropriate goals of competition law enforcement antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare recent eu commission guidelines on the application of article 101 tfeu appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of article 101 tfeu arguing that the professed adoption of an exclusive efficiency approach to article 101 tfeu does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in eu and us antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich

cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of article 101 tfeu could and should be under the modernized enforcement regime

the increasing complexity of insurance and reinsurance products has seen a growing interest amongst actuaries in the modelling of dependent risks for efficient risk management actuaries need to be able to answer fundamental questions such as is the correlation structure dangerous and if yes to what extent therefore tools to quantify compare and model the strength of dependence between different risks are vital combining coverage of stochastic order and risk measure theories with the basics of risk management and stochastic dependence this book provides an essential guide to managing modern financial risk describes how to model risks in incomplete markets emphasising insurance risks explains how to measure and compare the danger of risks model their interactions and measure the strength of their association examines the type of dependence induced by glm based credibility models the bounds on functions of dependent risks and probabilistic distances between actuarial models detailed presentation of risk measures stochastic orderings copula models dependence concepts and dependence orderings includes numerous exercises allowing a cementing of the concepts by all levels of readers solutions to tasks as well as further examples and exercises can be found on a supporting website an invaluable reference for both academics and practitioners alike actuarial theory for dependent risks will appeal to all those eager to master the up to date modelling tools for dependent risks the inclusion of exercises and practical examples makes the book suitable for advanced courses on risk management in incomplete markets traders looking for practical advice on insurance markets will also find much of interest

does competitive process constitute an autonomous societal value or is it a means for achieving more meritorious goals welfare growth integration and innovation the hypothesis of the normative foundations of european competition law is that the former is the case this insightful book analyses the phenomenon of competition from philosophical legal and economic perspectives demonstrating exactly why competitive process should not be viewed only as an instrument it consolidates various normative theories of freedom market and competition and explains how exactly they can be operationalized effectively in the matrix of the eu competition policy

the book gives a comprehensive treatment of the classical and modern ruin probability theory some of the topics are lundberg s inequality the cramér lundberg approximation exact solutions other approximations e g for heavy tailed claim size distributions finite horizon ruin probabilities extensions of the classical compound poisson model to allow for reserve dependent premiums markov modulation periodicity change of measure techniques phase type distributions as a computational vehicle and the connection to other applied probability areas like queueing theory in this substantially updated and extended second version new topics include stochastic control fluctuation theory for levy processes gerber shiu functions and dependence

includes buyers guide
