this book conveys a simple idea that the economic framework established by smith and coase is very useful in describing and explaining many facts in the real world smith s logic in the wealth of nations is simply the following the extent of market transactions division of stock division of labor economic growth the logic of coase in the coase theorem is that the delimitation of

rights is an essential prelude to market transactions the logic of these two great economists can therefore be combined in a comprehensive way delimitation of rights the extent of market transactions division of stock division of labor economic growth to the author calls this comprehensive version the smith coase framework in economics this framework will be repeatedly used in this book to explain various economic problems such as the law of demand growth and development monetary theory and policy among others according to lucas the approach of this book is classical because it makes no use of utility theory and because a household is truly a small factory à la becker household production function approach will be used to study the behavior of consumers this makes the substitution structure of production the focus of this book we view all economic agents as following the least cost principle meaning that they would try to produce the goods and services they need by using factors of production in the least costly way but there are at least four factors labor capital land and organization if we would like to accept the definition of marshall what economic agents will do is to substitute one factor for another in order to save the cost of production the ease of substitution between various factors is therefore important for determining the shape of the substitution structure of production based on the principle of least cost a simple mathematical model will be derived and used to explain various economic problems

this compelling book presents remarkable contributions from esteemed speakers who participated in the 28th international conference on difference equations and applications icdea 2023 hosted at phitsanulok thailand in collaboration with the international society of difference equations isde from july 17 to 21 2023 embark on an enriching journey through the realms of difference equations and discrete dynamical systems with practical applications spanning economics engineering biology and related sciences immerse yourself in cutting edge research as you explore new and significant breakthroughs within the fields of difference equations and discrete dynamical systems this comprehensive compilation spans diverse scientific disciplines demonstrating the profound impact of these theories and methodologies in practical and tangible settings from economic modeling to engineering optimization from biological systems to interdisciplinary applications this book exemplifies the versatility and relevance of difference equations and discrete dynamical systems designed to resonate with a wide audience including ph d students researchers educators and practitioners it goes beyond mere dissemination of recent results it actively fosters the advancement of knowledge serving as a catalyst for further explorations and innovations across the spectrum of sciences

this book is in equal parts a treatise on morality and economics a critique of neoclassical orthodoxy a brief for replacing mainstream economics with a radical political economics and an argument for the abandonment of neoliberal capitalism in favor of democratic socialism it includes a detailed proposal for a demand and cost alternative to supply and demand analysis and an in depth technical critique of both neoclassical high theory and applied microeconomic analysis demonstrating that these are not only infeasible or immoral but have directly contributed to public policy disasters further the book suggests that only a moral economics in the form of radical political economy can address the looming economic and environmental crises of today s world

baiman begins with an introduction to morality and ethics in both general sciences and in economics in particular he then guides readers through evidence of how neoclassical economics has not only failed to remain objective and value free but has become an ideology of apologetics protecting an immoral system in addition to breaking down real world examples to demonstrate his assertions baiman analyzes a theoretical utopia design exercise he concludes by arguing that the only form of economics that supports widely shared human values such as social equity democracy and solidarity is so called radical economics and that all true economics science should be directed toward achieving more socially productive economic activity an invaluable guide to morality and economics this book will appeal to researchers and teachers looking to change the way we think about economics policy and society

why do some authoritarian regimes topple during financial crises while others steer through financial crises relatively unscathed in this book thomas b pepinsky uses the experiences of indonesia and malaysia and the analytical tools of open economy macroeconomics to answer this question focusing on the economic interests of authoritarian regimes supporters pepinsky shows that differences in cross border asset specificity produce dramatically different outcomes in regimes facing financial crises when asset specificity divides supporters as in indonesia they desire mutually incompatible adjustment policies yielding incoherent adjustment policy followed by regime collapse when coalitions are not divided by asset specificity as in malaysia regimes adopt radical adjustment measures that enable them to survive financial crises combining rich qualitative evidence from southeast asia with cross national time series data and comparative case studies of latin american autocracies pepinsky reveals the power of coalitions and capital mobility to explain how financial crises produce regime change

technological progress has led to rapidly declining costs for transport and communication trade integration via nafta or the eu reduces the costs of economic distance even further this can have substantial consequences for the distribution of industries between peripheral and core regions based on recent advances in modeling economic geography this study shows the forces that influence the degree of economic concentration in the course of economic development and globalization the models are based on trade costs and economies and diseconomies of scale all of which are found to be empirically relevant factors for spatial concentration the study finds that in early stages of economic development rising gdp levels and lower trade costs increase spatial concentration while they decrease concentration in later stages so that it peaks at per capita incomes of around us 12 000 moreover the historic degree of spatial concentration is found to have a long lasting influence in the cross section of countries under study

essay from the year 2012 in the subject economics macro economics general grade 1 4 heriot watt university edinburgh school of management and languages language english abstract table of contents 1 introduction 2 gdp as a measure of economic activity

and well being 3 problems which arise by comparing gdp across countries 4 conclusion 5 list of references 1 introduction the purpose of this essay is to find out whether gdp gross domestic product is a good measure of economic activity and well being and which problems arise by comparing gdp across countries the paper starts with a brief definition of the gross domestic product strengths and weaknesses of the gdp with respect to measuring of economic activity and well being will be discussed in the following next the paper deals with difficulties which could occur by comparing gdp of different countries finally a conclusion is given to identify the key findings of this essay

includes annual list of doctoral dissertations in political economy in progress in american universities and colleges and the hand book of the american economic association

this book reflects on the post war western university and its discourses charting the crisis of the concept of the modern university

this volume contains papers that were presented at the symposium on computation in economics and finance organised under the auspices of the international federation of automatic control and the society for computational economics the conference was held at cambridge university uk from 29th june to the 1st july 1998 it attracted many members of the international academic and research community in computational economics finance and econometrics this volume brings together a number of papers that demonstrate the use of computational methods in a variety of areas in economics and finance the contributions to the symposium reflect the various shifts in the profession and the increasing use of computationally intensive techniques for the analysis of economic processes papers have been grouped into sections according to their context rather than in the order in which they were presented section 1 groups papers in the area of finance including both theoretical and empirical studies section 2 reflects a fast growing interest in seeking to model economic processes in novel ways drawing on the emerging literature in artificial intelligence and genetic adaptation section 3 demonstrates the growing use of computational languages as a tool for the analysis and modelling of economic systems subsequent sections range across many areas involving game theory policy co ordination agent based models time series and econometrics neural networks nonlinearities and simulation methods the preparation and selection of this volume owes much to the assistance and advice of both berccedil rustem and david kendrick and the steering committee of the society for computational economics

this journal attempts to fill a gap between the general interest press and other academic economics journals its articles relate to active lines of economics research economic analysis of public policy issues state of the art economic thinking and directions for future research it also aims to provide material for classroom use and to address issues relating to the economics profession
