the topics in this issue represent the most current research areas of the Eunice Kennedy Shriver National Institute of Child Health and Human Development NICHD Collaborative Pediatric Critical Care Research Network CPCCRN. The CPCCRN is a national pediatric critical care research network that is charged with investigating the efficacy of treatment and management strategies to care for critically ill and injured children as well as to better understand the pathophysiological basis of critical illness and injury in childhood. The proposed authors are past and present principal and co-investigators affiliated with the CPCCRN. The proposed topics represent the individual author's area of clinical and research expertise. Each review article is an up-to-date review of the topic relevant to practicing clinicians and trainees in critical care medicine with incorporation of the most recently published research findings pertinent to the topic, some of which may be the author's own. The specific articles are devoted to the following topics: cardiopulmonary resuscitation in pediatric and cardiac ICU; approach to the critically ill pediatric trauma patient; transfusion decision making in pediatric critical illness; pathophysiology and management of ARDS in children; ventilator-associated pneumonias in critically ill children; mechanical ventilation and decision support in pediatric intensive care; inflammation; pathobiology; phenotypes and sepsis from meningococemia to H1N1, MRSA to Ebola; immune paralysis in pediatric critical care; molecular biology of critical illness; sedation in pediatric critical illness; delirium in pediatric critical illness; challenges of drug development in pediatric intensive care; potential of all steroid hormone subclasses as adjunctive treatment for sepsis; morbidity changing the outcome paradigm; and end-of-life and bereavement care in pediatric intensive care units.

Suicide is a highly complex and multifaceted phenomenon with many contributing and facilitating factors and variables. However, given its being one of the most severe human behaviors, an obvious focus would be to identify the underlying psychological mechanisms and processes that may lead to suicidal ideation and behavior. This ebook is dedicated to studies exploring various approaches to the psychology of suicidal behavior as well as of non-suicidal self-injury (NSSI). The purpose of this ebook is to shed light on in-depth examinations of the current knowledge and empirical data regarding models, theories, and specific dimensions and variables that may help us increase the psychological understanding of suicidal phenomena. The specific goal is to identify particular psychological characteristics that may be used to develop prevention and intervention methods and programs. We believe that this ebook can contribute to the understanding of this behavior and help to develop specific tools, therapeutic guidelines, and programs that may help reduce the number of suicides occurring annually. This ebook is dedicated to our dearest friend Dafni Assaf, who was one of the greatest leaders of the suicide prevention program in Israel.
