do you need guidelines for choosing a substitute organic solvent that is safer to use do you need an effective cheap but perhaps temporary way to reduce exposures before you can convince your employer to spend money on a long term or more reliable solution do you need information about local exhaust ventilation or personal protective equipment like respirators and gloves industrial hygiene control of

airborne chemical hazards provides the answers to these questions and more science based and quantitative the book introduces methods for controlling exposures in diverse settings focusing squarely on airborne chemical hazards it bridges the gap between existing knowledge of physical principles and their modern application with a wealth of recommendations techniques and tools accumulated by generations of ih practitioners to control chemical hazards provides a unique comprehensive tool for facing the challenges of controlling chemical hazards in the workplace although william popendorf has written the book at a fundamental level he assumes the reader has some experience in science and math as well as in manufacturing or other work settings with chemical hazards but is inexperienced in the selection design implementation or management of chemical exposure control systems where the book is quantitative of course there are lots of formulae but in general the author avoids vague notation and long derivations
