now in its tenth edition and in continuous publication since 1959 Apley Solomon's System of Orthopaedics and Trauma is one of the world's leading textbooks of orthopaedic surgery relied upon by generations of orthopaedic trainees the book remains true to the teaching principles of the late Alan Apley and his successor Professor Louis Solomon this new edition is fully revised and updated under the leadership of new editors it retains the familiar Apley philosophy and structure and is divided into three major sections general orthopaedics regional orthopaedics and trauma thus enabling readers to gain the knowledge they need for their lifetime learning

The figure of King Solomon is central to our understanding of the history of Israel and Judah this volume of collected articles brings the reader up to date with the latest scholarship in the field the work consists of twenty-four chapters and provides important studies in the historical approach to Solomon and to 10th century BCE Judah and Israel with archaeological surveys of the neighboring regions sociological surveys and literary readings of the biblical texts with suggestions for further research and indexes

Research data sharing has traditionally been addressed to other peer researchers nowadays there is general awareness that putting research at the disposal of society is beneficial and necessary however the popularization of science is a hard endeavor it must deal with transmission of transcendental knowledge with the appealing adornment of a good story but avoiding the risk of falling into banality this book consists in a series of individual stories delving into the world of biology and medicine some topics included in this volume consist in the explanation of basic biological concepts like the origin of modern eukaryotic cells the importance of mutations as the driving force behind evolution the molecular ins and outs of the nervous system or the relevance of microorganisms to humans and science including food and energy industries others rather lean to a more biomedical perspective and constitute popular cases that have been to some extent trending in global media

outlets the divulgence of some current under reckoned non infectious pandemics like obesity and chronic pain the presence of longer living populations around the world named blue zones the american and african opioid crisis or the discovery and development of crispr cas as a promising genetic editing tool all chapters are depicted with accompanying illustrations thoroughly elaborated by professionals of fine arts to make it easier to understand for the non experts but may perhaps also proof that the scientific method and multidisciplinary work are not unique to natural sciences but also shared by other apparently distant disciplines like arts

vols 1898 include a directory of publishers
