in the slow philosophy of j m coetzee jan wilm analyses coetzee s singular aesthetic style which he argues provokes the reader to read his works slowly the effected slow reading is developed into a method specifically geared to analyzing coetzee s singular oeuvre and it is shown that his works productively decelerate the reading process only to dynamize the reader s reflexion in a way that may be termed philosophical drawing on fresh archival material this is the first study of its kind to explore coetzee s writing process as already slow as a program of seemingly relentless revision which brings forth his uniquely dense and crystalline style through the incorporation of material from drafts and notebooks this study is also the first to combine an exploration of the writer s stylistic choices with a rigorous analysis of the reader s responses the book includes close readings of coetzee s popular and lesser known work including disgrace waiting for the barbarians elizabeth costello life and times of michael k and slow man

excerpt from introductory philosophy a text book for colleges and high schools the efforts which have been made in recent years to provide the beginner in philosophy with a text book suited to his needs are justified both by the importance of the subject and by the requirements of educational method it is obvious that an introduction should really introduce in other words that it should present philosophy in such a way as to arouse the student s interest give him a firm grasp of essentials and encourage him to further study but how these results are to be secured is still an open question the books that have so far appeared have each from its own point of view distinct advantages either as outlining the history of philosophical problems or as setting forth the claims of rival systems or as explaining the principles which serve as the foundation of some

special system and a basis of criticism in discussing variant theories an introduction that will combine these several utilities seems to be our present need dr dubray s aim in this volume is to lead the student by easy approaches into the field of philosophy and to show him its divisions with their several problems and the solutions which these have received in accordance with the principles of correct method the knowledge which the student has already acquired is made to serve as the starting point and from this he is led on to the consideration of more abstract philosophical concepts and theories these again are presented in clear statement and orderly sequence with sufficient indication of outstanding questions yet without the excess of detail which sometimes destroys proportion or results in narrowness of view at the same time definite conclusions are presented with the evidence on which they rest so that the student may get from his use of the book not merely a lot of vague questionings but a certain amount of positive knowledge and critical direction for later investigation about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
