human beings have wondered about the stars since the dawn of the species does life exist out there intelligent life even or are we alone the quest for life in the universe touches on fundamental hopes and fears it touches on the essence of what it means to formulate a theory grasp a concept and have an imagination this book traces the history of the science of this area and the development of new schools in philosophy its essays seek to establish the history and philosophy of astrobiology as research fields in their own right by addressing cognitive linguistic epistemological ethical cultural societal and historical perspectives on astrobiology the book is divided into three sections the first cognition focuses on the human mind and what it contributes to the search for life it explores the emergence and evolution of terrestrial life and cognition and the challenges humans face as they reach to the stars the essays raise philosophical questions pose ethical dilemmas and offer a variety of approaches including one from cognitive zoology in formulating a theory of the universal principles of intelligence the limits of human conceptual abilities and the human mind's encounter with the unknown the second section communication examines the linguistic and semiotic requirements for interstellar communication what is needed for successful communication are there universal rules for success what are the possible features and limitations of exolanguages what is required for recognizing a message as a message the third section culture considers cultural and societal issues it explores astrobiology's organization as a scientific discipline its responsibilities to the public sphere and its theological implications it reviews the historically important panspermia hypothesis along with the popularization of astrobiology and its ongoing institutionalisation through addressing these questions we take our first steps in exploring the immense terra incognita of extraterrestrial life and the human mind

this book is the preliminary part of a great work titled the book of the egyptian the beginning of the basic egyptology or a key to the understanding of history philosophy and world religion usually the introduction is made in the form of a brief preface or foreword but i got a whole book as the first step in a multi volume publication of the study the purpose of this specific introduction as the beginning of serious research is right at the level of the opening to inspire a reader showing him in a clear visual and comprehensible form the whole true mechanism of the hieroglyphic writing to achieve this i will completely dispel the myth created by the modern science that hieroglyphs do not convey any meaning of words the whole idea but only individual sounds letters or their combination syllables this scientific myth will be finally deprived of the status of scientific knowledge and the translation of the phaistos disc on the contrary will be clearly shown what is called broken apart and will be read in the ancient hieroglyphic language united by the principle of construction in the language of the ancient egyptians i can say that it will not be two simultaneously existing systems of hieroglyphs translation as well as two egyptologies one will be false and the other true to prove the validity of the system of translation i wanted to give you immediately not only a complete translation of the text of the phaistos disc where the number of occurrences of each hieroglyph is not big 1 to 19 times but the translation of the whole ancient egyptian writing because the number of times it is used in there is thousands if not even millions and each such use of each hieroglyph is translating in the same way so it creates the full reading of the hieroglyphic texts writing which will be easily read by everyone with the dictionary of hieroglyphs in the future the main reason why i wanted to do it is because at first i read the ancient egyptian texts and only then by chance came across with the hieroglyphs of the phaistos disc but then i decided to set a different aim to teach the reader to think and not just to read hieroglyphs since we have no ancient egyptian temple and you re not its novice the method of achieving the aims will be different than in the antiquity first of all i would suggest not a translation of ancient egyptian hieroglyphs but a complete translation of the phaistos disc and at the same time to give them a sort of test of common sense to modern science in the face of particular academies and universities of the world let them answer me the question not knowing the translations of ancient egyptian texts whether they think this translation of the phaistos disc is correct so when i completely publish the book of egyptian it will become clear who they are and where do they lead all of you as they always test the students it s a time to test them as well will they pass the test i do not know but any way you my reader will get to know about it in the main manuscript and will be able to draw your own conclusions about their intellectual level therefore i recommend you to take this message of the book at least with the attention because not every day the science gets a ready revelation designed in the form of scientific study and here the attention and common sense will help the reader to re look the original pure uncomplicated meaning of the

hieroglyphs which through the veil of delusion will finally begin to appear in their true original and vibrant colors and finally get from the nether world into the realm of the living

featuring contributions by distinguished scholars from ten countries the wiley handbook of the history and philosophy of criminology provides students scholars and criminologists with a truly a global perspective on the theory and practice of criminology throughout the centuries and around the world in addition to chapters devoted to the key ideas thinkers and moments in the intellectual and philosophical history of criminology it features in depth coverage of the organizational structure of criminology as an academic discipline world wide the first section focuses on key ideas that have shaped the field in the past are shaping it in the present and are likely to influence its evolution in the foreseeable future beginning with early precursors to criminology s emergence as a unique discipline the authors trace the evolution of the field from the pioneering work of 17th century italian jurist philosopher cesare beccaria up through the latest sociological and biosocial trends in the second section authors address the structure of criminology as an academic discipline in countries around the globe including in north america south america europe east asia and australia with contributions by leading thinkers whose work has been instrumental in the development of criminology and emerging voices on the cutting edge the wiley handbook of the history and philosophy of criminology provides valuable insights in the latest research trends in the field world wide the ideal reference for criminologists as well as those studying in the field and related social science and humanities disciplines

the name dggtb deutsche gesellschaft für geschichte und theorie der biologie german society for the history and theory of biology reflects recent history as well as german tradition the society is a relatively late addition to a series of german societies of science and medicine that began with the deutsche gesellschaft für geschichte der medizin und der naturwissenschaften founded in 1910 by leipzig university s karl sudhoff 1853 1938 who wrote we want to establish a german society in order to gather german speaking historians together in our special disciplines so that they form the core of an international society yet sudhoff at this time of burgeoning academic internationalism was quite willing to accommodate the wishes of a number of founding members and drop the word german in the title of the society and have it merge with an international society the founding and naming of the society at that time derived from a specific set of historical circumstances and the same was true some 80 years later when in 1991 in the wake of german reunification the deutsche gesellschaft für geschichte und theorie der biologie was founded from the start the society has been committed to bringing

studies in the history and philosophy of biology to a wide audience using for this purpose its *jahrbuch für geschichte und theorie der biologie* parallel to the *jahrbuch the verhandlungen zur geschichte und theorie der biologie* has become the by now traditional medium for the publication of papers delivered at the society's annual meetings in 2005 the *jahrbuch* was renamed *annals of the history and philosophy of biology* reflecting the society's internationalist aspirations in addressing comparative biology as a subject of historical and philosophical studies
