the general theory of relativity and its applications to cosmology requires very deep understanding of mathematics and physics keeping this in mind this self contained textbook is written which addresses to general relativity and cosmology in this book the attempts have been made to explain mathematicians notions in the language of a physicist primarily intended for the postgraduate students of mathematics and physics it gives equal importance to mathematical and physical aspects and thus sharpens understanding of the theory the text covers many modern concepts and current developments in gravity and cosmology including brans dicke theory higher derivative gravity kaluza klein theory with extension to higher dimensions besides pg students this book would also be useful for research scholars key features highlights special features of general relativity and cosmology discusses structure formation in the universe inflationary models and dark energy models with special focus on basic concepts provides problems at the end of each chapter to stimulate thinking reveals interconnections between required mathematical concepts explains how to apply mathematical concepts to physical problems discusses lagrangian formulation of the field theory and action principle as it provides a powerful tool to derive field equations and energy momentum tensor components

the book was produced due to answer the basic questions and the basic ideas about the origin and fate of human beings cannot be resolved only through beautiful mathematical equations but also can be answered through spiritual wisdom human duality principle this book is the result of the great efforts of mine try to explain the spiritual self spirit gnosis and natural self body mind of human being are inherited in the self of human being the dual nature of human being the self in its inner life has two phases subsequent to its natural mind and spiritual spirit existence human being is the most exclusive individual and therefore the duality of spirit and mind both are associated with him the self in its inner life has two phases subsequent to its natural mind and spiritual spirit existence

the buddha answers all questions that a scientist like stephen hawking has in his mind two beginning less self existent entities are the universe and the buddha field at high energy level both covert in to each other the buddha field gives birth to physical and psychic particles souls at high energy level a soul converts in to the buddha field mass is of two kinds positive mass is due to souls a soul is cause of dark matter gravitational force is repulsive in nature between two souls attractive between matters outer region of the universe is dark because here beings are without material bodies here time does exist but without space psychic matter is the cause of expanding universe god s atom does exist all heavenly bodies including black holes are abodes of beings stars are born due to gravitational instability in the orion nebula caused by god number of god is uncountable in the universe very soon the world will see all religions barring buddhism marxism and all other wrong views dying of natural death i have dedicated this book to stephen hawking one of the brilliant theoretical physicists since einstein

this invaluable book now in its second edition covers a wide range of topics appropriate for both undergraduate and postgraduate courses in
