the inability of forecasters to predict accurately the 1990 1991 recession emphasizes the need for better ways for charting the course of the economy in this volume leading economists examine forecasting techniques developed over the past ten years compare their performance to traditional econometric models and discuss new methods for forecasting and time series analysis

there is an uncomfortably large gulf between academic research and what policy economists use to understand the economy a practical guide to macroeconomics shows how economists at policy institutions approach important real world questions and explains why existing academic work theoretical and empirical has little to offer them it argues that this disconnect between theory and practice is problematic for policymaking and the economics profession and looks at what is needed to make academic research more relevant for policy the book also covers topics related to economic measurement and provides a compact overview of us macroeconomic statistics that will help researchers use these data in a better informed way

an inside look at modern approaches to modeling equity portfolios financial modeling of the equity market is the most comprehensive up to date guide to modeling equity portfolios the book is intended for a wide range of quantitative analysts practitioners and students of finance without sacrificing mathematical rigor it presents arguments in a concise and clear style with a wealth of real world examples and practical simulations this book presents all the major approaches to single period return analysis including modeling estimation and optimization issues it covers both static and dynamic factor analysis regime shifts long run modeling and cointegration estimation issues including dimensionality reduction bayesian estimates the black litterman model and random coefficient models are also covered in depth important advances in transaction cost measurement and modeling robust optimization and recent developments in optimization with higher moments are also discussed sergio m focardi paris france is a founding partner of the paris based consulting firm the intertek group he is a member of the editorial board of the journal of portfolio management he is also the author of numerous articles and books on financial modeling petter n kolm phd new haven ct and new york ny is a graduate student in finance at the yale school of management and a financial consultant in new york city previously he worked in the quantitative strategies group of goldman sachs asset management where he developed quantitative investment models and strategies

a guide to the continually evolving field of labour economics
