introduction to management science 3e offers a unique model approach and integrates the use of excel through this approach students are better able to grasp the essential concepts covered in the course and see their utility each chapter includes a case study that is meant to show the students a real and interesting application of the topics addressed in that chapter these cases and related applications cuts across all functional areas of business and show how management science techniques apply in the business environment

for well over a decade now we have seen a growing analytics revolution as we have entered the era of big data analytics including data science now plays a key role in dealing with numerous managerial concerns business analysts who analyze these problems no longer can depend primarily on using the techniques of management science the discipline of business analytics now needs to be used as well to meet this need business schools now have substantially increased their coverage of business analytics in fact many business schools now offer a master s program in business analytics

introduction to management science 3e offers a unique model approach and integrates the use of excel through this approach students are better able to grasp the essential concepts covered in the course and see their utility each chapter includes a case study that is meant to show the students a real and interesting application of the topics addressed in that chapter these cases and related applications cuts across all functional areas of business and show how management science techniques apply in the business environment

introduction to management science 4e offers a unique model approach and integrates the use of excel through this approach students are better able to grasp the essential concepts covered in the course and see their utility each chapter includes a case study that is meant to show the students a real and interesting application of the topics addressed in that chapter these cases and related applications cut across all functional areas of business and show how management science techniques apply in the business environment

this book introduces multiple criteria and multiple constraint levels linear programming mc2lp which is an extension of linear programming lp and multiple criteria linear programming mclp in the last decade the author and a group of researchers from the usa china korea germany and hungary have been working on the theory and applications of mc2lp problems this volume integrates their main research results ranging from theoretical bases to broad areas of real world applications the theoretical bases include the formulation of mc2lp integer mc2lp and mc2 transportation model fuzzy

mc2lp and fuzzy duality of mc2lp optimal system designs and contingency plans mc2 decision support system and mc2 computer software development the application areas are accounting management information systems production planning and telecommunications management the book serves as a seminar text for both undergraduates and graduates who have a linear algebra or equivalent background for practitioners it will help in handling lp type problems in multiple decision making environment

the prison system is widely believed to be an immutable element of contemporary society many criminologists and sociologists of deviance believe that decarceration movements have failed to yield progressive reform and that feasible alternatives to the prison system do not exist maeve mcmahon challenges these views reconstructing the emergence of critical perspectives on decarceration she examines analytical and empirical problems in the research she also points out how indicators of community programs and other penalties serving as alternatives to prison have typically been overshadowed through critical focus on their effects in widening the net of control mcmahon presents a detailed analysis of decreasing imprisonment and of the part played by alternatives in this during the postwar period in ontario drawing from extensive documentary research and from interviews with former correctional officials she charts the changing climates of opinions and socio economic factors which facilitated decarceration by situating her analysis in the context of theoretical and political arguments about the possibility of decarceration mcmahon provides in her work a stimulus to the development of progressive penal politics not just in canada but in all western countries

assembly lines are productive systems which are very efficient for homogeneous products in the automotive industry an assembly line is used in the production of several vehicle variants including numerous configurations options and add ins as a result assembly lines must be at the same time specialized to provide high efficiency but also flexible to allow the mass customization of the vehicles in this book the planning of assembly lines for uncertain demand is tackled and optimization algorithms are offered for the balancing of such lines building an assembly line is a commitment of several months or even years it is understandable that the demand will fluctuate during the lifetime of an assembly line new products are developed others are removed from the market and the decision of the final customer plays a role on the immediate demand therefore the variation and uncertainty of the demand must be accounted for in an assembly line in this book methods dealing with random demand or random production sequence are presented so that the practitioners can plan more robust and efficient production systems
