the greatest game of all or rugby league as it is known to some has given me nearly a half a century of pleasure and a little pain in 1966 at the ripe old age of 6 i was introduced to our game when my uncle harry moved into the bedroom i shared with my younger brother in a 2 bedroom fibro joint in rockdale dragon territory harry was playing lower grades for jack gibson's roosters and went on to play for st george in the 1971 grand final against my other front rower mate john sattler and his rabbitoh's by the age of 9 i had memorized every player in the big league magazine the game became my obsession even if i had not been lucky enough to play over 100 games in the best competition in the world arguably in any sport rugby league was in my blood as a rothmans medal winner the official player of the year award in 1983 succeeded by the dally m medal i have always been aware of the history of our great game and its effect on society especially in the northern states of australia apart from obtaining a law degree at sydney university i studied the politics in sport while completing my arts degree at macquarie university i believed our game was ahead of sports like baseball gridiron and basketball that relied heavily on statistics to rate their great players

public education plays a crucial role in crafting a nation's future in the united states education reform policy particularly the reliance on large scale standardized testing is a growing topic of national conversation and concern an illusion of equity the legacy of eugenics in today's education demonstrates how centuries of propaganda have led us to accept the idea that test scores indicate something so valuable about human beings that they should be used to organize society drawing on decades of experience as an educator author wendy zagray warren unpacks the origins of this practice inviting us to probe the ideologies underlying testing procedures and score interpretation and to evaluate the rationale for using test scores as the sole markers for academic achievement from the beginning large scale tests have produced scores divided by race and class initially these results aligned with the eugenic ideology of its creators warren shows that while the rhetoric used to justify test based policy has changed the model used to produce test scores remains much the same therefore so do the outcomes of test based policies which continue to reproduce and reinforce the existing social hierarchy of the united states the hope of equity lies in educators charting new paths and scholars around the world who are dreaming new educational paradigms into being ultimately warren invites policymakers educators and parents to explore the richness of possibility when education is designed around the belief that every child is worthy of the opportunity to thrive
