harold d lasswell is arguably the quintessential face of political science to the larger public of the past century however there is a side to lasswell less well known but of special importance in this day and age the place of the profession of politics as an academic activity this book written at the start of the culture wars thirty years ago outlines the basic core position of political science practitioners it helps to explain why the field kept its collective cool when other social science professionals veered to more extreme activist positions the future of political science grew out of the phenomenally rapid expansion of the study of government in the united states and elsewhere the study of professionalism among physical scientists lawyers engineers etc was not matched by such internal examination within the social sciences until much later lasswell s overview centered on developments in the united states there unfettered study of government reached unprecedented heights in the final stage of the twentieth century the key concept of this volume one that continues to inform discourse is the relationship of political science as a mechanism for the study and teaching of the political system to the field as a tool of the establishment this concern grew in the wake of a variety of scandals and secret support sponsored by both government and non government organizations alike the future of political science covers areas ranging from membership size and disparities intervention scenarios in world events the nature of creativity in political research collaboration in projects with the other social sciences and the location of scientific centers of gravity in the study of politics because of lasswell s works we have a field of the political science of knowledge as well as the sociology of knowledge harold d lasswell served as ford foundation professor of the social sciences at yale university distinguished professor of policy sciences at joh

a generation ago scholars saw interest groups as the single most important element in the american political system today political scientists are more likely to see groups as a marginal influence compared to institutions such as congress the presidency and the judiciary frank baumgartner and beth leech show that scholars have veered from one extreme to another not because of changes in the political system but because of changes in political science they review hundreds of books and articles about interest groups from the 1940s to today examine the methodological and conceptual problems that have beset the field and suggest research strategies to return interest group studies to a position of greater relevance the authors begin by explaining how the group approach to politics became dominant forty years ago in reaction to the constitutional legal approach that preceded it they show how it fell into decline in the 1970s as scholars ignored the impact of groups on government to focus on more quantifiable but narrower subjects such as collective action dilemmas and the dynamics of recruitment as a result despite intense research activity we still know very little about how groups influence day to day governing baumgartner and leech argue that scholars need to develop a more coherent set of research questions focus on large scale studies and pay more attention to the context of group behavior their book will give new impetus and direction to a field that has been in the academic wilderness too long
