among the considerations of the two dozen papers are the reception and development of einstein s theory of general relativity in various institutions around the world conceptual issues of the theory especially themes concepts and principles associated with his theory of gravity a number of tech

like all natural hazards flooding is a complex and inherently uncertain phenomenon despite advances in developing flood forecasting models and techniques the uncertainty in forecasts remains unavoidable this uncertainty needs to be acknowledged and uncertainty estimation in flood forecasting provides a rational basis for risk based

what is the raison d être of auditing does auditing only exist by the grace of the legislator or does auditing fulfill other needs in contemporary society for many companies auditing has been made mandatory this is possibly one of the reasons why researchers to date have given limited attention regarding the drivers for the demand for audit auditing seen as a social control mechanism is part of an organizational order in society therefore it is essential to reflect on the changing demands of society as a lack of insight why society demands an audit accommodates the risk of not meeting the needs and expectations of society the added value of auditing may be called into question this dissertation deals with the question what are drivers for the demand for audit for dutch sme companies which are not mandatory required to have their financial statements audited

with the present ninth volume we bring to a conclusion the edition of the collected papers of professor h a lorentz it contains the evidence of his constant activity to promote the interest in science of a larger public in particular of his country men by addresses on se veral occasions by articles in magazines and newspapers and other wise in a certain way in this part of his work he belongs more partic ularly to his country therefore we reproduce it in the original lang uage with the exception of his inaugural address as leiden professor early in i878 which readers abroad might be interested in the

sketch of ludwig boltzmann in the german language contains a most powerful and deep going survey of the scientific work of this genius in several places the character of the man s personality rather than that o the scientist reveals itself his attitude towards various problems and his personal views in his first address he refers to the value of mathematics we hear his dislike for too vivid visual speculations and crude hypotheses his taste for the soberness of mathematical formulae where he argues that the fundamental principles must needs escape further explanation on page 54 we read what he said about determinism and on page 181 he expresses himself on the relation of matter and mind his intimate feelings on space and time and the aether are touched upon on pages 240 261 274
