beginning with the birth of Jesus and tracing the religion established by his followers up to the present day the faith is a comprehensive exploration of the history of Christianity judiciously covering all the signal moments without bogging down in minutia author Brian Moynahan's superbly written and generously illustrated book is of central importance to Christians historians and anyone interested in a faith that shaped the modern world Moynahan's research uses little known sources to tell a magnificent story encompassing everything from the early tremulous years after Jesus' death to the horrors of

persecution by nero from the growth of monasteries to the bloody crusades from the building of the great cathedrals to the cataclysm of the reformation and the catholic counter reformation from the flight of pilgrims from europe in pursuit of religious freedom to the salem witch trials from the advent of a traveling pope to the rise of televangelists coming just in time for jubilee 2000 this ambitious book reveals and commemorates the significance of the christian faith

the theme of this volume was first presented as the lyman beecher lectures on preaching at the yale divinity school in 1945 some of the same lectures were given by arrangement under the warrack lectureship on preaching at the universities of glasgow and aberdeen in scotland in the winter of 1947 some of the chapters were used as the basis of lectures given under the olaf petri foundation of the university of uppsala in sweden i sought to develop various portions of a general theme in these various lectureships in this volume i have drawn these lectures into a more comprehensive study of the total problem of the relation of the christian faith to modern conceptions of history while the total work therefore bares little resemblance to the lectures it does contain consideration of the specific problems which were dealt with in the lectures i shall not seek to identify this material by chapters as i subjected the whole to reorganization two of these lectureships usually deal with the art of preaching though not a few of the actual lectures have been concerned with the preacher s message since i had no special competence in the art of homiletics i thought it wise to devote the lectures to a definition of the apologetic task of the christian pulpit in the unique spiritual climate of our day since several of the beecher lecturers in the past half century sought to accommodate the christian message to the prevailing evolutionary optimism of the nineteenth and early twentieth centuries i thought it might be particularly appropriate to consider the spiritual situation in a period in which this evolutionary optimism is in the process of decay this volume is written on the basis of the faith that the gospel of christ is true for men of every age and that jesus christ is the same yesterday today and forever it is nevertheless the task of the pulpit to relate the ageless gospel to the special problems of each age in doing so however there is always a temptation to capitulate to the characteristic prejudices of an age

over the past two thousand years christianity has grown from a small and persecuted sect crucified or set on fire tacitus wrote of them in nero s rome so that when darkness fell they burned like torches in the night into an immense congregation that straddles the globe the faith traces the astonishing journey it has made from jesus and the cross to the present day this is a story of fierce drama and incomparable scope and brian moynahan tells it superbly the apostles are here and the first monks constantine is

converted rome falls to the barbarians and heartlands are lost to islam religious zeal inspires the great cathedrals and the crusades and underpins the settlement of the new world the travails of the faith in the reformation and counter reformation are succeeded by the perils of the age of revolutions and the assaults by hitler stalin and mao beneath the great themes of christian history the book is richly peopled by individuals by saints mystics inquisitors flagellants scholars soldiers and artists of sublime brilliance whether he is discussing doctrinal schism witch hunts or the mormons moynahan always writes with balance and objectivity he is no apologist for the manifest cruelties so often perpetrated in the name of christ but he also portrays the power and beauty of a faith which has endured for so long and inspired so many at a time when christianity is on the retreat in many western countries the faith is a vivid reminder of the beliefs that shaped the world in times more spiritual than our own

a scholar s critical examination and comparison of the teachings of some of the world s major religions primarily christianity and buddhism to a lesser extent islam and judaism the author s thesis is that no religion can claim to be the only true religion without involving human society either in bitter conflict or in merciless persecution an eminent scholar s critical examination and comparison of the teachings of some of the world s major religions primarily christianity and buddhism to a lesser extent islam and judaism the author s main thesis is

a basic christian claim is that god is active in human history to accomplish his purpose which he will do in the end this book considers some of the implications of this far reaching claim christian faith is bound up with our personal history but beyond that stretches far into the past faith is not identical with historical knowledge for example with knowledge of the facts about jesus facts which must be established historically that involves using

the historian's methods of investigation what does god reveal himself in history mean Christians claim to find an ultimate meaning in history but how can that be how is it possible to find an overall meaning in history theistic or otherwise since Christians appeal to the new testament in making the claim that god revealed himself in Jesus we must go beyond that book to the Christian community which existed before there was a new testament and out of whose midst its writings came to understand those books we must interpret so where do our principles of interpretation come from and how valid are they this is the question of tradition this small book is an introduction to these interesting topics hopefully it will help to clarify important issues and lead the reader to investigate such central matters further

the story of Jesus of Nazareth as recounted in the new testament has always been understood by the church to be historically true it is an account of the life death and resurrection of a real person whose links with history are firmly signalled in the creeds of the early church which affirm that Jesus suffered under Pontius Pilate contemporary historical scholarship has however called into question the reliability of the church's version of this story and thereby raised the question as to whether ordinary people can know its historical truth this book argues that the historicity of the story still matters and that its religious significance cannot be captured by the category of non historical myth the commonly drawn distinction between the Christ of faith and Jesus of history cannot be maintained the Christ who is the object of faith must be seen as historical the Jesus who is reconstructed by historical scholarship is always shaped by commitments of faith a reconsideration of the enlightenment epistemologies that underlie much historical scholarship shows that historical knowledge of this story is still possible such knowledge can be inferential based on historical evidence a careful look at contemporary new testament studies and the philosophical and literary assumptions upon which it rests shows that this scholarship should not undermine the confidence of lay people who believe that they can know that the church's story about Jesus is true

Amanda Porterfield offers a survey of ideas rituals and experiences of healing in Christian history Jesus himself performed many miracles of healing and Christians down the ages have seen this as a prominent feature of their faith indeed healing is one of the most constant themes in the long and sprawling history of Christianity changes in healing beliefs and practices offer a window into changes in religious authority church structure and ideas about sanctity history resurrection and the kingdom of God Porterfield chronicles these changes at the same time shedding important new light on the universality of religious healing finally she looks at recent scientific findings about religion's

biological effects and considers the relation of these findings to ages old traditions about belief and healing

this book arises out of the need which has been felt for what might be called a primer of christianity it is especially for those who are conscious of the great importance today of the scientific outlook and want to know how christian faith and christian theology can claim to be true when measured by scientific standards richardson shows that there can be and does exist a real science of theology working on the data provided by the historical facts concerning christ and the church and that it has reached real and important results he outlines what these are and shows how they point the way to the next step which can only be taken by each person for himself personal faith

these essays only two of which have appeared previously in english reflect troeltsch s vast knowledge and deep insight into modernity which led him to discern the radical implications of historicity for religion and theology his thought remains a resource a guide and a prod in an ongoing theological quest

walls shows how the demographic transformation of the church has brought us to a new ephesian moment the church is challenged as never before to become one global body with its many cultural and ethnic members contributing their gifts former patterns of domination need to be superseded his seer s eyes probe beneath the surface to bring the reader insights into pentecostalism african traditional religion and the ironic ways in which the western missionary movement often accomplished things both for good and for ill that its agents never dreamed of
