is war an institution of international society and how is it constituted as such across the evolution of international society this book is an inquiry into the purpose of war as a social institution as originally put forward by hedley bull it offers a comprehensive examination of what is entailed in thinking of war as a social institution and as a mechanism for order since the terrorist attacks of 9 11 the subject of war has become increasingly relevant with questions about who can wage war against whom the way war is fought and the reasons that lead us to war exposing fundamental inadequacies in our theorisation of war war has long been considered in the discipline of international relations in the context of the problem of order however the inclusion of war as an institution is problematic for many how can we understand an idea and practice so often associated with coercion destruction and disorder as contributing to order and coexistence this study contends that an understanding of the core elements that establish the character of war as an institution of modern international society will give us important insights into the purpose if any of war in contemporary international relations this ground breaking book will be of strong interest to students and scholars of international relations international relations theory the english school security studies and warfare

at the opening of the twenty first century while obviously the world is still struggling with violence and conflict many commentators argue that there are many reasons for supposing that restrictions on the use of force are growing the establishment of the international criminal court the growing sophistication of international humanitarian law and the rebirth of the just war tradition over the last fifty years are all taken as signs of this trend this book argues that on the contrary the just war tradition allied to a historically powerful and increasingly dominant conception of politics in general is complicit with an expansion of the grounds of supposedly legitimate force rather than a restriction of it in offering a critique of this trajectory just war and international order also seeks to illuminate a worrying trend for international order more generally and consider what if any alternative there might be to it

nations at war provides an explanation of war in international politics grounded on data based empirical research the book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume in addition case analyses of two wars the iran iraq war 1980 and world war i 1914 are provided as demonstrations of scientifically based explanations of historical events the primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws the conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies

civil aviation has become a public utility service salvatore tomasino i although civil aviation has enjoyed unflagging public interest since its birth in 1919 and even before

that date the factors governing the development of civil aviation are nevertheless not widely known this applies not so much to technical development as to the political and economic considerations which ultimately determine the pattern of the worldwide network of air routes whereas prior to world war ii civil aviation was regarded mainly as an instrument for political penetration with perhaps the netherlands and its k l m 2 as a striking exception since 1945 civil aviation has come to be judged more on its own merits though it has remained primarily a government matter the political strategic economic financial and social aspects of civil aviation together constitute a field which particularly since world war ii has come to form the subject matter of a more or less independent branch of foreign policy designated by the term international civil aviation policy in spite of the dominating factors of national prestige and later of economic nationalism states have nevertheless directly and indirectly taken upon themselves a number of obligations in the international field thereby giving civil aviation an international legal basis

the history of war is also a history of its justification the contributions to this book argue that the justification of war rarely happens as empty propaganda while it is directed at mobilizing support and reducing resistance it is not purely instrumental rather the justification of force is part of an incessant struggle over what is to count as justifiable behaviour in a given historical constellation of power interests and norms this way the justification of specific wars interacts with international order as a normative frame of reference for dealing with conflict the justification of war shapes this order and is being shaped by it as the justification of specific wars entails a critique of war in general the use of force in international relations has always been accompanied by political and scholarly discourses on its appropriateness in much of the pertinent literature the dominating focus is on theoretical or conceptual debates as a mirror of how international normative orders evolve in contrast the focus of the present volume is on theory and political practice as sources for the re and de construction of the way in which the justification of war and international order interact with contributions from international law history and international relations and from western and non western perspectives this book offers a unique collection of papers

exploring the continuities and changes in war discourses as they respond to and shape normative orders from early modern times to the present covering 1816-2016 this book deals extensively with the international system as well as the territorial outcomes of several key wars that were waged during that time period providing an instructive lesson in diplomatic history and international relations among global powers based on an in depth review of the leading theories in the field of international relations international relations theory of war explains an innovative theory on the international system developed by the author that he applies comprehensively to a large number of case studies the book argues that there is a unipolar system that represents a kind of innovation relative to other systemic theories it further posits that unipolar systems will be less stable than bipolar systems and more stable than multipolar systems providing new insights relative to other theories that argue that unipolar systems are the most stable ones the first chapter is devoted to explaining the manner of action of the two dependent variables systemic international outcome and intra systemic international outcome the second chapter presents the international relations theory of war and its key assumptions the third chapter precisely defines the distribution of power in the system the fourth chapter examines the theory's two key phenomena the fifth and last chapter presents the book's conclusions by examining the theoretical assumptions of the international relations theory of war
