until the recent political shift pushed workers back into the media spotlight the mainstream  
media had largely ignored this significant part of american society in favor of the moneyed  
upscale consumer for more than four decades christopher r martin now reveals why and how  
the media lost sight of the american working class and the effects of it doing so the  
damning indictment of the mainstream media that flows through no longer newsworthy is a  
wakeup call about the critical role of the media in telling news stories about labor unions  
workers and working class readers as martin charts the decline of labor reporting from the  
late 1960s onwards he reveals the shift in news coverage as the mainstream media  
abandoned labor in favor of consumer and business interests when newspapers especially  
wrote off working class readers as useless for their business model the american worker  
became invisible in no longer newsworthy martin covers this shift in focus the loss of political  
voice for the working class and the emergence of a more conservative media in the form of  
christian television talk radio fox news and conservative websites now with our fractured  
society and news media martin offers the mainstream media recommendations for how to  
push back against right wing media and once again embrace the working class as critical to  
its audience and its democratic function

the presence of turbulence in multiple areas of our society food fuel and finances being but  
three critical areas presently being impacted means that long held assumptions are no  
longer true that the past is not prologue and that the future is not clear and enter into this  
unstable present the discipline of evaluation a discipline formed and shaped in the past fifty

years of stability little turbulence and strong assumptions that everything will go according to plan if things do not go well it is because of either a poor theory of change on how to bring about positive outcomes or weak efforts at implementation it is not because of the stormy present upsetting our quiet past as it is conventional evaluation behavior and beliefs are ill suited for these times the transformational nature of the arab spring is just one arena in which it is clear that a business as usual approach to evaluation is entirely inappropriate the papers in this volume are from the 2011 global assembly of the international development evaluation association ideas nearly 350 development evaluators from eighty five countries came together in amman jordan to discuss and analyze the consequences of turbulence on evaluation the intent of these papers is to systematically assess what changes have come during this time of turbulence and how these changes are impacting the craft of development evaluation to be clear this book is not about how to assess the impacts of crises on development and on people s lives it is about the meaning of a changed world and changed assumptions on the concepts and methods used in evaluation
